AUTHENTYS

Professional. Reliable. Secure.

4 yr. Warranty INCLUDED

AUTHENTYS PRO 600 ID Card Printer

The ultimate standard in high-quality, secure ID card printing, the Authentys PRO 600 features optimized color profiles, faster print speeds (19 seconds for YMCKO cards), and multiple upgrade options to fit your needs. Backed by an industry-leading service and support team, the Pro 600 provides a complete printing solution to support your physical security needs.

AVAILABLE OPTIONS:

Dual-sided Printing

Magnetic Stripe Encoding

RELIABLE & EASY TO USE:

- Single or dual-sided dye sub printing
- Full color, monochrome, and thermal rewritable
- Batch printing & manual feed mode
- Custom watermark technology
- Industry-leading 4-year warranty
- TrueSupport service options

Flexible & Secure Card Printing

Protecting your cardholder data is important – that's why the new Authentys PRO 600 has important security updates. With built-in Digital Shredding, the PRO 600 will fragment the print job data sent to your printer to make it irrecoverable and prevent unauthorized users from accessing your card information. The printer will also regularly run security scans.

Custom Watermark Technology

For maximum security and professionalism, the built-in technology adds a hologram-like watermark over your printed card without any additional supplies. This added layer of visual security makes cards harder to tamper with or duplicate. The PRO 600 printer includes one free Custom watermark design securely programmed with your logo or artwork (a $598 savings) as well as ten standard designs.
