

## Empower your Healthcare Operation with a unified workforce

That's the power of Zebra Workforce Connect

Communication and collaboration have a great impact on patient care and outcomes. That's why complex workflows and technical failure should have no place in high-demand workflows such as healthcare and order fulfillment, since these can cause:

- 9.3 hours lost in looking up information
- Communication gaps between teams and HQ
- Up to 60 minutes lost navigating between apps
- Overlooked priority patients
- Time-consuming device locationing

## Close gaps with Zebra Workforce Connect for empowered decision-making - from anywhere in your facility.

Real-time emergency alerts and hands-free communication

Wall-to-wall connectivity for the whole facility

Zero interference as push-to-talk capabilities are streamlined in your Zebra clinical device

Secured text messaging for HIPAA compliant data sharing

Track critical assets instantly throughout the warehouse

Fast locationing of staff and assets with just a press of a button

Create reports based on actionable insights gathered on your device

Improved task management to assign and manage tasks from devices

## Go beyond push-to-talk communication with Zebra's mobile computers.

- Android OS
- Disinfectant-ready design
- Seamless tap-and-pair with peripheral devices
- Intelligent PRZM data capture
- WorryFree WiFi
- Long-lasting battery power to survive your longest shift

## Barcodes, Inc. specializes in streamlining communication in your healthcare operation.

Know who and where your workers are when you choose Zebra Workforce Connect and Barcodes, Inc. for modernization that empowers the workforce.
