

# APG's Stratis™ Tablet Holder for Mobile POS Solutions

## The Stratis™ Tablet Holder

APG's Stratis™ tablet holder is designed for retailers who are installing mobile and/or Thin (Thinbility) iPad® based point of sale applications. POS software is moving to tablets and to the cloud for easy accessibility and instant reporting. Designed to allow the retailer to take advantage of the small foot print tablet, the Stratis™ tablet holder adds an elegant look to your POS environment.

The tablet holder gives the cashier a firm base to work from during transaction processing. Should the customer's signature be necessary, the iPad® can "flip or slide" over to the customer for the signature approvals. Magnetic connection keeps the Stratis tablet holder firmly in place on the cash drawer.

Detachable tablet mount enables mPOS transactions (shown on a Vario 1313 here).

*The Stratis™ holder enables an iPad to seamlessly slide over to the customer facing side for signature approvals.*

The Stratis tablet holder is a sleek design and integrates easily into a retailer's modern "cloud-based" environment.

### Stratis Tablet Holder Features:

- |               |  |                      |  |
