

IP Telephony: IP 700 Series

Introducing ADTRAN's New SIP Phones

ADTRAN offers stylish, new IP phones.

ADTRAN® offers SIP-enabled phones designed to address the growing converged Voice over IP (VoIP) and IP telephony marketplace for small businesses and large enterprises. The ADTRAN IP 706, a six-button programmable phone and the IP 712, a 12-button expanded version, both offer an affordable and standards-based solution that delivers unsurpassed quality and performance.

Ease of Use, Style and Productivity

The ADTRAN IP 700 Series of telephones delivers an attractive and functional business-class telephone for today's businesses, all at affordable and cost-effective prices. In addition to the appealing desktop style for business offices of any type, users will appreciate the large, backlit, easy-to-read LCD screens and well-designed layout of frequently used buttons and functions. On-screen menus and navigation keys work together in an intuitive, user-friendly manner. ADTRAN's IP phones are designed to provide enhanced efficiency and convenience for the user.

Enhanced Functionality

The ADTRAN IP phones are available in either six- or 12-line versions, supporting multiple call functions. Dedicated keys are available for the most common user functions with additional programmable soft keys. On-screen menus enable users to quickly change directory information and phone settings, as well as view a history of internal/external and missed calls, and program distinctive ring tones for specific calls. The phones include an adjustable desk stand or can be wall mounted and feature high-quality, full duplex speakers engineered for clear, hands-free communication. An integrated headset jack with electronic hook-switch eliminates the need for a mechanical handset lifter. The overall enhanced functionality for the price makes ADTRAN IP phones among the most cost-efficient business-class IP phones.

Quick, Easy Set-up

The ADTRAN 700 Series features an intuitive, Graphical User Interface (GUI) for easy set-up and installation. The phones can be directly powered from the NetVanta® 7000 Series or a Power over Ethernet (PoE) switch, providing inline power and eliminating the need for a separate power supply. The phones also have two Ethernet ports to connect to a PC for converged voice and data across a single wiring infrastructure. ADTRAN phones can be locally powered, allowing for multiple options for worry-free installation and ease of use.

IP 700 Series Product Features

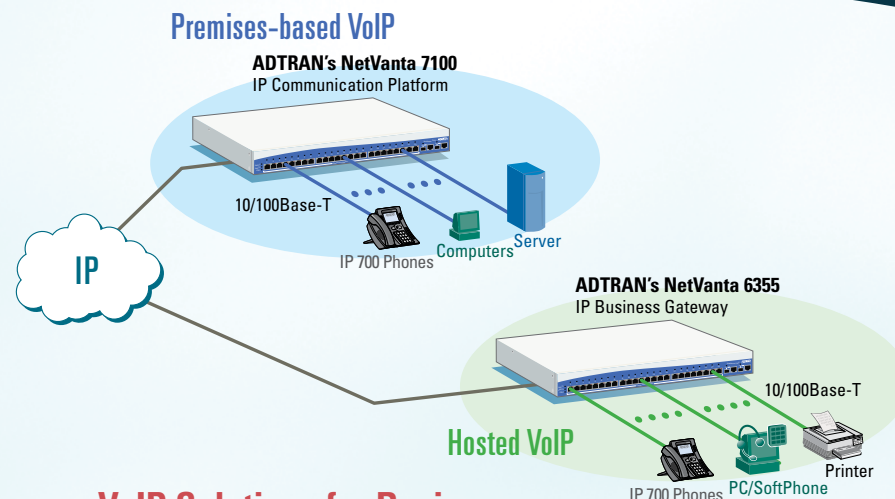

- 6 or 12 programmable buttons
- Large backlit display
- Message waiting indicator
- Integrated headset jack
- Web-based management
- Distinctive ring tones

Being based on SIP-standards, the NetVanta 700 Series IP Telephones are interoperable with leading soft switches to easily integrate into VoIP networks.

ADTRAN'S New IP Phone

An attractive and intuitive design with large backlit display, works with both premises-based and hosted applications.

VoIP Solutions for Business

ADTRAN offers a wide range of attractive VoIP solutions for today's market. ADTRAN IP phones can be used with the NetVanta 6355 IP Business Gateway for hosted applications, or with the NetVanta 7000 Series for premises-based VoIP applications.

ADTRAN's converged access solutions are designed for SMBs and multi-site Enterprises and significantly lower Total Cost of Operations (TCO). ADTRAN's portfolio of business gateways, multiservice routers, unified communications systems, IP phones and phone systems provides smart solutions for hosted VoIP and premises-based IP telephony.
