

Total Access 1500

Narrowband Multiservice Access Platform

Product Features

- POTS, specials, and data supported
- Up to 96 two-wire interfaces
- Compact (2U) mounting for crowded COs or RTs
- Fully redundant commons
- TR-08 signaling fully compatible with SLC®-96
- Up to five times as dense as a D4 channel bank when used for specials
- TL1 interface to NMA™ over X.25
- SNMP management
- Integrated digital and metallic test access
- Mechanized Loop Testing (MLT)
- Redundant power feeds
- NEBS Level 3 and UL 1950 compliant
- Industry-leading 10-year warranty

The ADTRAN™ Total Access® 1500 is a Carrier-Class, multiservice access platform for deploying narrowband services from TDM network access. A compact, versatile platform, Total Access 1500 integrates the functionality of many Carrier products into a single high-density chassis. Total Access 1500's small footprint (2U-high mounting) makes it the perfect choice for integrated communications providers such as ILECs, CLECs, and ISPs who need to deploy services from crowded Remote Terminals (RTs), Central Offices (COs), or Co-Location (COLO) facilities.

Total Access 1500 provides a variety of services including POTS, special services (ISDN, DDS, FXO, FXS, E&M, DPO, DPT, and PLAR), and data services. Total Access 1500 complements ADTRAN's Total Access 3000 broadband multiservice access platform, which can terminate and distribute higher bandwidth services such as SONET, DS3, HDSL, HDSL2, T1, and optical DS2. Total Access 1500 can be deployed as a:

- Small Digital Loop Carrier (DLC), for a simple and effective means of deploying POTS (up to 96 lines in a 2U mounting)
- Special services delivery platform, with up to five times the density of any competing platform (D4)
- IAD, serving up to 96 customers with voice and data services

Total Access 1500 is a modular device with five common slots and 24 access slots. Common units required for operation are a Power Supply Unit (PSU), a Line Interface Unit (LIU), and a System Controller Unit (SCU). A second, redundant PSU and LIU may be deployed for added reliability. The PSU is available with an integrated ring generator providing up to 40 REN ringing capacity. The LIU can support up to four T1 interfaces and has full Time Slot Assignment (TSA) capability. This feature allows users to "steer" varied amounts of bandwidth from the network to any of the access slots, ensuring that no bandwidth is stranded. The 24 access slots accept a variety of voice and data access modules, allowing users to optimize their service for each application.

Using local or remote inband management, service providers can provision and monitor the bank's network interface and access modules. Transaction Language 1 (TL1) protocol is used to communicate with Telcordia's NMA Operations Support System (OSS) using an internal X.25 PAD. An Ethernet 10BaseT connector is used for connection to SNMP networks and Telnet. ADTRAN's ADVISION™ software, run on a Hewlett-Packard Openview workstation, provides a graphical user interface (GUI).

Total Access 1500 is designed for 23-inch relay racks. Full compliance with NEBS Level 3 and UL 1950 ensures maximum reliability and safety.

Total Access 1500

Narrowband Multiservice Access Platform

Product Specifications

Mechanical

■ Dimensions: 3.5 in. H X 23 in. W X 11 in. D

■ Weight: 12 lbs. (chassis only)

Network Interfaces

■ Transport: DS1

Capacity: 1 to 4 T1 plus 1 protect T1
 Line Rate: 1.544 Mbps +/- 75 bps
 Physical interface: Wire wrap
 Framing: D4 (SF)/ESF, TR-08

■ Line code: AMI/B8ZS ■ Input signal: 0 to -36 dB

■ DSO assignment: User-selectable

■ T1 transmit timing: Loop, local, external

 TR-08 Support: Single Party Ringing (SPR) and Universal Voice Grade (UVG) analog ports supported with FXS modules. CLASS® services.

Testing and Troubleshooting

Local: Payload and line loopbackRemote: Payload and line loopback

Network Interface Test Jacks

■ Bantam jacks: RXMON, TXMON

Performance Monitoring

■ Error counts: ES, SES, UAS, %, AS, %, EFSEC, alarms, and error rates

■ **Reports:** NI information stored for last 24 hours (in 15-minute increments)

Electrical

■ **DC Power:** -40 to +56 VDC

■ Connection: Screw terminals (A and B feed)

Regulatory Standards

■ NEBS Level 3

■ UL 1950

FCC Part 15 (Class A) and Part 68

Management

Craft Interface

Accessible from front of SCU

 Electrical interface: EIA-232, PC serial port, or modem

■ Physical connector: DB-9 front

10BaseT Port

■ SNMP/TELNET

X.25

■ TL1

Environmental

■ Operating temperature: -40°C to +65°C

■ Storage temperature: -20° to +70° C

■ Relative humidity: Up to 95 percent, noncondensing
