Hands-free Scanning

The AirTrack FB-1 wearable is designed for on-the-go mobile scanning in harsh indoor and outdoor environments. It can activate a mobile computer to read 1D or 2D barcodes, so you can keep up with even the most demanding workplace. The FB-1 connects to a mobile computer via NFC and then, subsequently, via Bluetooth each time the finger button is pressed to transmit data back to the mobile device.

Compatible, Mobile Scanning Options

Choose to connect your AirTrack FB-1 to the Honeywell CT40, CT60 or EDA51, each with their own large screen display. The FB-1 is lightweight, weighing at only 15 grams (0.03 pounds). It has a long-lasting battery – lasts up to 4 months – that can easily be replaced with your fingers in seconds. It also comes equipped with a comfortable Velcro strap that can be easily adjusted by the user on the index finger.

EXPERIENCE THE POWER OF

AirSupport

What is AirSupport?

In addition to industry-leading warranties, add AirSupport to your products for:

- Extended warranty coverage against defects
- Comprehensive coverage on select products
- Technical support for the life of the warranty
- Free 30-day demo for pilots
- AirSpare – If your device stops working due to a manufacturing defect, get a comparable spare while we evaluate it*
