

Aldelo Fingerprint Server

- Fast User Log In
- Simplify and enhance security
- Streamline business processes
- Address compliance concerns
- Reduce password management costs

Fast Biometric Authentication

Aldelo Fingerprint Server is a great biometric authentication add-on for Aldelo For Restaurants Pro & Lite Editions. Our fingerprint security works with Digital Persona U.are.U family of scanners, enabling your staff to perform quick logons without any additional steps.

No Lost Cards or Passwords to Worry About

Aldelo Fingerprint Server is fast, secured and fully integrated with our POS solutions. No longer will your staff need to remember long access codes, or worry about losing magnetic swipe cards.

Total Security Control

Aldelo Fingerprint Server enables you to control exactly who has access to your system without any compromises. Concerns such as time card buddy punching, sharing of access codes between staff members and the chance of stolen manager access codes are completely eliminated with our fingerprint security.

Technology Driven Peace of Mind

Our fingerprint security helps you prevent anyone the ability to impersonate one another. Your staff will enjoy the new way of fingerprint logon because it is fast and simple. You will also enjoy the fingerprint logon because of the security & peace of mind that this technology offers.

One Test Drive and You Will Be Sold

If you are still dealing with access codes and magnetic swipe cards, then why not take to the next step and try our fingerprint security solution. Once you have given it a test drive, you would not want to go back!
