Aldelo Kitchen Display Server

- Fast Real Time Ordering
- Improve Performance
- Seamless Integration
- Rock Solid Order Protection
- Maximum Flexibility
- Total Kitchen Efficiency

Fast Real Time Ordering

Aldelo Kitchen Display Server allows your POS terminals to submit orders to your kitchen in real time for faster production. With Aldelo Kitchen Display Server, your cooks will no longer be frustrated by slow kitchen printers or lost tickets.

Improve Performance

In a fast paced quick service environment, time is everything. That's why you need Aldelo Kitchen Display Server to help you improve your kitchen production performance.

Seamless Integration

Aldelo Kitchen Display Server offers quick service restaurants a seamless integration between Aldelo For Restaurants Pro, or Lite Editions and Logic Controls' Logic Net Kitchen Display System for fast and efficient kitchen production control.

Maximum Flexibility

Aldelo Kitchen Display Server allows you to custom configure color options, routing options, display options and much more. Our kitchen solution supports up to 16 kitchen monitors and also supports the ability to route menu items based on order types for maximum flexibility.

Rock Solid Order Protection

Aldelo Kitchen Display Server is also reliable. Our solution uses Jet 4.0 (Microsoft® Access 2003 Compatible) database to hold kitchen production orders. Your kitchen orders, whether bumped or not, is safe even if you restart your system. Best of all, our Aldelo For Restaurants provides automatic queuing of unsent kitchen orders in case of network connection outage.

Customer Satisfaction Thru Enhanced Performance

Aldelo Kitchen Display Server also provides your managers the ability to review kitchen production performance. You can easily retrieve information such as how long kitchen orders take to produce. Aldelo Kitchen Display Server gives you the ability to better staff kitchen resources and improve kitchen response, resulting in more satisfied customers and repeat business.
