ARUBA AP-65WB WALL BOX ACCESS POINT

The Aruba AP-65WB is a dual radio (dual-band concurrent 802.11a plus b/g) high-performance indoor wireless access point capable of supporting multiple functions including WLAN access, air monitoring/wireless intrusion detection and prevention, and secure enterprise mesh across the 2.4-2.5 GHz and 5 GHz RF spectrums. The AP-65WB is built with a unique housing designed to fit inside a standard US double-gang electrical wall box. The AP-65WB is ideal for hotels, student housing, hospitals, and other areas where unobtrusive mounting is required. Builders can install the AP-65WB throughout new-construction office buildings, preparing them for a future wireless deployment. Centrally managed from an Aruba controller, the AP-65WB empowers the network administrator with unparalleled control over services, security and deployment models.
