AXIS 295
Video Surveillance Joystick

Easy joystick control of Axis PTZ and dome network cameras

The Video Surveillance Joystick is a USB device specifically designed to provide the network video industry with responsive and accurate control of pan/tilt/zoom and domes cameras. Featuring a three-axis Hall-effect joystick, twelve programmable push-buttons and USB interface, the Video Surveillance Joystick integrates seamlessly with any video surveillance software platform recognizing joystick inputs via Microsoft's DirectX.

- Easy to install and configure using USB interface

- Durable high quality joystick (Hall-effect)

- Cost-efficient solution for control of PTZ and dome cameras

- X/Y-axis for positioning and turning handle for zoom

- Twelve programmable push-buttons, 2 on handle and 10 on base housing
