

Only from Epson!

The First Recycled Thermal Receipt Paper
Made with 70% PCW

And It's
BPA Free!

Epson-qualified recycled thermal paper

- Paper comprised of 70% post-consumer waste (PCW), the highest percentage available
- BPA (Bisphenol A) free
- Approved for use in Epson's TM-T88V, TM-H6000IV and TM-H2000 printers
- Print quality and price comparable to standard thermal paper
- Paper cores and cartons are made of recyclable materials
- Available in standard roll sizes

Benefits for your business

- Paper is easy to order from your authorized Epson reseller
- Help meet your "green goals" with the first thermal receipt paper with 70% PCW
- Give your customers peace of mind with BPA-free paper
- Epson-qualified paper ensures top performance with Epson printers
- Customize the back of receipt with 70% PCW or BPA-free messages
- Cost and print quality comparable to standard thermal paper

Now you can make your POS system "greener" with the world's first recycled thermal receipt paper made with 70% PCW from Epson. And it's BPA free so any of your customers concerned about receipts containing this chemical can have peace of mind. In addition, you can let your customers know that you support the environment by having the back of the receipt paper pre-printed with 70% PCW or BPA-free messages.

Best of all, the recycled paper meets Epson's strict media qualification standards and has a price comparable to standard thermal paper. It has been approved for use in Epson's ENERGY STAR[®] qualified printers including the TM-T88V, TM-H6000IV and TM-H2000.

Ordering is easy!
