Free Design Service

Application Design Service

Bogen's Application Design Service was created to assist with the design of paging systems for any and every project encountered.

It's fast, comprehensive, and **FREE**. So let us design it for you!

The Application Design Service provides:

- **Speaker Placement Design**
- **Complete Bill of Material** – This includes product description, model number, and quantity. We can even fax it to the distributor of your choice for pricing, if you wish.
- **Connectivity Drawings**
- **Scope of Work**
- **Detailed Assumptions**
- **Red-lined Blueprints** (blueprints must be supplied; AutoCAD® blueprints accepted)

Here's how the Application Design Service works:

- You provide information about the project (see *Site Survey Check List* on page 72). For large or complex applications, your local Bogen Field Sales Manager can visit the site for exact specifications.

- Bogen will provide you with a working technical bid response document... and then all you have to do is deliver it.

  A copy of the bid will also be sent to your local Bogen Field Sales Manager for immediate follow-up, and to see if you have any questions or need additional assistance.

  Put Bogen's resources and expertise to work for you.

No application is too big, small, simple, or complex for Bogen paging products.

Call 1-800-999-2809 (option 2)
for more information or to send in a project for us to work on right now.
