High-resolution Printing

Brother **QL-580N**

BROTHER NETWORK-READY

TVO GREAT MODELS TO CHOOSE FROME

BROTHER QL-580N

- Up to 2.4" wide labels
- Up to 68* labels per minute
- Heavy Duty Cutter
- High resolution text and graphics at up to 300 x 600 dpi**
- Great for mailing labels, file folders, creating bar codes, and sharing among your office work group

Or, for more versatile applications, step up to the BROTHER QL-1060N

BROTHER QL-1060N

- Up to 4" wide labels
- Up to 69* labels per minute
- Great for networked applications that require wide labels, such as signs, banners and specialized labeling solutions

KEY FEATURES:

Label printers with built-in Ethernet interfaces make them easy to connect and manage over the network.

HIGH QUALITY PRINTING

Professional high-resolution printing (up to 300 x 300 dpi on the Brother QL-1060N; up to 300 x 600 dpi** on the Brother QL-580N) captures all the fine details of pictures, logos, graphics and bar codes.

EASY TO INSTALL

Brother QL Label Printers come with easy to install label creation software and drivers. Simply place the CD into your PC and follow the user prompts. It's that easy!

ACCEPT WIDE LABELS

The Brother QL-1060N Label Printer prints on labels up to 4" wide. The Brother QL-580N prints on labels up to 2.4" wide. This provides flexibility, with a wide range of label and tape rolls to choose from. Print on labels as small as 1/2" diameter round labels or, with the Brother QL-1060N, as large as our 4" x 6" shipping labels.

BUILT-IN AUTOMATIC CUTTERS

The Brother QL-580N and QL-1060N Label Printers come with a built-in heavy duty automatic cutter. This allows for labels to be cut at various intervals, for easy handling of large print jobs and ensuring a clean professional finish when using continuous tape rolls.

Photos are for illustrative purposes only.

^{*} Using 4 line address label. Text only. At 300 x 300 dpi.

^{**} In superfine mode.

B-PAC SOFTWARE DEVELOPMENT KIT PROVIDES TOOLS FOR EASY INTEGRATION

There is a wide range of cost effective, crisp white paper labels for your envelopes, packages, slide labels, retail price labeling, name badges, file folders and more. For added durability, use our film labels when creating customized signage on demand or for CD/DVDs. Once printed - it is easy to peel and apply your label or sign.

EASY DROP-IN LABEL AND TAPE ROLLS

The Brother QL Label Printers use easy dropin rolls so you can switch label types in seconds. The machines automatically sense which roll you have in and adjust your on-screen template to the correct size.

DIE-CUT (PRE-SIZED) LABELS

Labels come in assorted sizes, such as; address labels, shipping labels, slide labels, retail food and price labeling, CD/DVD labels and file folder labels.

CONTINUOUS TAPES

SHELF BH29 IIMMI

Continuous tapes allow you to determine the length of the label. Great for labeling long packages, binders or creating cost effective signage on demand.

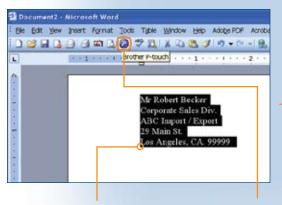

USER-FRIENDLY, BUT POWERFUL, P-TOUCH® EDITOR V.5 LABEL CREATION SOFTWARE

Create labels using information stored in Microsoft® Word, Excel® and Outlook® (Available for Windows® only)

HIGHLIGHT: select the text from your document.

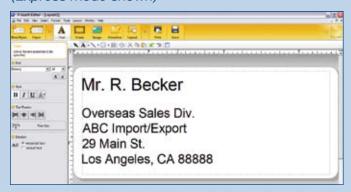

PRINT: your label right away or edit as desired.

Photo is for illustrative purposes only.

CLICK: the add-in button on the toolbar to pull the data into the label creation software.

Get creative and design your own labels using the included P-touch® Editor software (Express mode shown)

3 INPUT LEVELS' IN THE LABEL CREATION SOFTWARE:

- **1. SNAP FUNCTION:** Allows for screen capture to be easily incorporated into a label design.
- EXPRESS MODE: This mode is perfect for the beginner or for creating labels quickly (shown in picture above).
- PROFESSIONAL MODE: Create sophisticated label designs in this mode or for the expert label designer.

POWERFUL SOFTWARE INTEGRATION TOOLS WITH THE b-PAC SOFTWARE DEVELOPMENT KIT

What is b-PAC Software Development Kit

b-PAC is Brother's Application Programming Interface (API) for its P-touch® Editor label design software. b-PAC gives programmers a way to use specific features of the P-touch® Editor software without having to open the application. Using b-PAC, programs can pass text, numbers, graphics, and bar code data to a label template, and print the label directly to any of Brother's Label Printers.

b-PAC offers added versatility in creating label templates

As an alternative to creating a label in their specific application, developers can create a label template with P-touch® Editor, and use b-PAC to pass the data to the pre-defined template. Because b-PAC integrates seamlessly with Brother label printers, you'll always know that the labels will print as expected.

Free Download of b-PAC Software Development Kit

b-PAC provides automation components for using P-touch® Editor label templates, and can be used by any application that supports COM Automation. Included with the b-PAC installation are the distribution component and license, complete documentation, and sample code written in Visual Basic, Visual Basic for Applications, Visual Basic Script, and Visual C++. Developers can download any of Brother's b-PAC software development kits at: http://www.brother.com.

WHY NETWORK A LABEL PRINTER?

A networked label printer allows multiple users to be connected and use one machine. All users on the LAN network – whether they are PC or Mac users – can access a networked Brother QL Label Printer. The advantages of this include:

- Single shared printer means low initial purchase cost to serve multiple users
- Saves space
- · Easy to install and manage
- Able to print remotely from another location
- Print different sized labels without having to change rolls – this is possible if there is a series of label printers connected to the network and each machine holds a different roll type

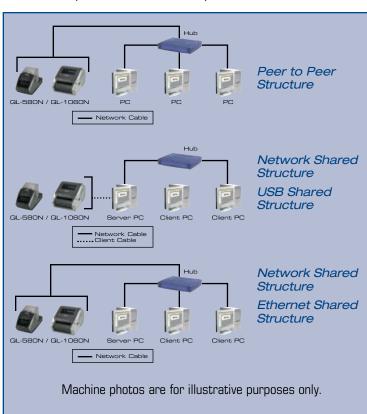

EASY TO INSTALL

Installing the Brother Label Printer onto the Network:

It is simple to install a Brother QL Label Printer onto a network using the user-driven installation software.

Network Structures (Shown Below)

The Brother Label Printer can be connected to a network via a peer to peer structure or by using a Network Shared Structure (USB or Ethernet model).

EASY TO MANAGE

Brother Network management tools provide a range of features to make it easier to manage Brother QL Label Printers. These include:

Monitor Printer Status

 Included with the Brother QL-1060N and QL-580N is our BRAdmin Network Management Software which allows you to easily configure and check the status of your network-enabled printers.

Error Checking

- Local USB connection an error message appears immediately on-screen to identify the error that has occurred.
- Network connection The 3 color LED flashes red to indicate an error has occurred. An error message is displayed on the task bar of your PC running the Brother Status Monitor.

BRAdmin Network Management Software

BRAdmin Light (Available on Included CD)

BRAdmin Light is a utility used in the initial set up of Brother network connected devices. It allows the user to search for printers, view printer status and configure basic network settings. BRAdmin Light provides easy access to vital information on the Brother QL-1060N or QL-580N.

BRAdmin Professional For Windows (Available via FREE download from: http://solutions.brother.com)

BRAdmin Professional offers a more advanced management of network connected Brother devices. It includes BRAdmin Light functions as well as allows the Administrator to access multi-printer settings.

Using BRAdmin Professional the Administrator can access the following information:

- Device (Status, Speed, Emulation, Memory, Template and Node Type)
- Printer (Media Status, Media Type, Total Cut Count, Total Print Length, etc)
- Printer Set Up (Emulation, Power, and Baud Rate)
- Operation Controls (User Reset, Factory Reset, Print Setting Lists and Cancel Jobs)
- Network configuration settings such as IP Address, Node Name and Protocol Control

Web BRAdmin

(Available via FREE download from: http://solutions.brother.com)

Web BRAdmin is the web based utility for advanced enterprise management of network connected Brother devices. It has the same functionality as BRAdmin Professional. (requires IIS server support)

TIP: The Brother QL-1060N and QL-580N use the same network management interface as our range of MFCs (all-in-ones) and laser printers, making it easier to integrate the machine into your current system.

BROTHER LABEL PRINTER SPECIFICATIONS

FEATURES	Brother QL-580N	Brother QL-1060N
Operation Modes	PC Connected / Stand-alone (ESC/P or P-touch® Template)	
Maximum Print Speed (labels per minute [▲])	68⁴	69 ⁴
