The DLI 8500P vehicle mount computer combines wireless communications, GPS, and mobile computing in a single portable device suited to a variety of industrial applications including:

- Material handling vehicles including forklifts, stock pickers & motorized pallets
- Police, fire, EMS, & security vehicles
- Industrial & heavy construction vehicles
- Baggage handling, refueling & airport security
- Shipyard, dock side & maritime cargo facilities

## Engineered to deliver a new level of flexibility, performance, & value in a rugged in-vehicle computer.

**Power and portability come together in the industry's most affordable in-vehicle computer.** The new **DLI 8500P Vehicle Mount Computer (VMC)** is the perfect in-vehicle or fixed mount platform no matter what the task or operating environment. From the loading dock to the warehouse floor, inside the squad car, ambulance, semi-truck or bulldozer, the DLI 8500 provides lightning fast access to the mission critical data that drives your business.

Sporting an Intel® Atom processor, up to 3 GB of RAM, and a 10.4" outdoor-readable touchscreen display, the DLI 8500P provides enough processing muscle and screen real estate to power the most demanding applications you can throw at it. **Running multiple (& concurrent) wireless communication options - including GPS, WiFi, Bluetooth, CDMA and GPRS -** means the DLI 8500P moves mobile computing into an even wider array of rugged environments including logistics, public safety, transportation and field service.

Housed in an ergonomic, impact-resistant casing and offering a wide variety of mounting options, this IP64-rated rugged device is easily installed into most any industrial or commercial vehicle.
