## Stand alone 8 port Conference Bridge for any tele- phone system

### Conferencing

**Most telephone systems support some limited conference features. DVBridge gives every telephone system sophisticated conference features.**

DVBridge connects up to eight single line extensions on any telephone system or directly to Central Office lines.

**Eight Ports** Most key systems and smaller PBXs will support up to three parties in an outside conference. With DVBridge, any single conference call can contain up to eight participants. By installing multiple DVBridge systems, multiple eight port conferences are supported. You can even 'conference' multiple DVBridges together to make larger conferences.

**Password Protection** to assure privacy, conference access is password protected.

**Secured Meetings** The conference organizer can close a meeting to additional participants. The meeting can later be unlocked to allow others to join.

**Instant Conferencing** To join a conference, participants need only dial the lead DVBridge number and, when the system answers, enter the password. This means that you can schedule a conference without having a conference organizer in charge of setting up and ending it.

**Call-out conferencing** A conference organizer can have the system place outbound calls to participants to invite them to join a conference in progress.

- *Use DVBridge to eliminate costly conference call service charges.*
- *Give your staff unprecedented flexibility to set-up meetings, collaborate, and get the job done.*
- *Reduce unnecessary travel.*

### Programming

All programming is by touchtone commands and is prompted and confirmed by easy to understand spoken prompts.

Two levels of access allow the Administrator to manage system settings, and the Meeting Organizer to manage individual meetings.

#### Administrative Features:

##### Administrator

- Set Conference Mode
- Set Passwords
- Set Language optns.
- Set number of rings to answer

##### Meeting Organizer

- Lock / unlock meetings
- Call-out to participants

*For instant meetings, no administration is required. Participants simply call into the DVBridge and, when prompted by the system, enter the default meeting password.*

### Recording

An audio output jack supports recording of conference calls. Output: - 50dBm~2dBm

### Specifications

Size: 8.25" x 6" x 1.25"  
Power: AC100V / 220V
