

EAGLE *PASSIVE INFRARED DETECTOR*

A b o v e t h e R e s t

- CEILING MOUNT PASSIVE INFRARED DETECTOR.
- THIN, SLEEK DESIGN WHICH LOOKS SMOOTH AND CLEAN.
- PC BOARD SHIELDED AGAINST RFI AND EMI - SHIELDED BODY ENSURES PERFECT STABILITY.
- 3 PULSE TECHNOLOGY - GREATER FALSE ALARM IMMUNITY.
- 31 DUAL BEAM DETECTION ZONES IN A 360° DEGREE PATTERN.
- UP TO 7 METER (23 FT) DIAMETER COVERAGE.

PASSIVE INFRARED DETECTOR

A b o v e t h e R e s t

When you want to be above everything else but still be able to detect with high sensitivity, the EAGLE is the right detector for you.

Installed high on the ceiling, the EAGLE's unique features include:

- * A very thin shape which looks smooth and clean at the installation site.
- * PC board shielded against RFI and EMI - shielded body ensures perfect stability.
- * SMD Technology.
- * Fresnel Lens Technology
- * Selectable (1, 2 or 3) pulse count technology - Greater false alarm immunity.
- * 31 dual beam detection zones.
- * 360 degree detection.
- * Up to 7 m (23 ft) diameter coverage.
- * Superbright LED indication in event of alarm.
- * Temperature compensation.

The EAGLE provides the high performance that you've come to expect from the Electronics Line state-of-the-art security products. The EAGLE's Low Price stems from high-efficiency automated manufacture and large volume production. Feature for feature, the EAGLE far surpasses any competitive product in price/performance figures.

ELECTRICAL SPECIFICATIONS

- * Operating Voltage: 9 - 16 VDC
- * Temperature Compensation: 20⁰ to 120⁰ F
- * Power Consumption: 15 mA at 12 V (standby)
- * Relay Output: Normally-closed contacts
- * Alarm Duration: 1 sec. min.
- * Tamper Switch: Normally-closed contacts
- * Reverse Polarity Protection: Diode

Electronics Line (E.L.) Ltd.

HEAD OFFICE AND MANUFACTURING:

58 Amal St. Kiryat Arie, P.O.B. 3253 Petah Tikva 49130 Israel
