

Hypercom® Optimum T4210

Maximum Performance, Minimum Cost

Maximizing Value at the
Point of Sale

Benefits at a Glance

- Powerful and affordable
- Support all payment types
- Small foot print – takes up little counter space

The Hypercom® T4210 is a reliable and powerful payment terminal with features to support your growing needs. It can effectively process various transaction types including credit, debit, gift cards, dynamic currency conversion and electronic benefits transfer (EBT). With the addition of an imager, checks can even be turned into electronic transactions, increasing efficiency and cash flow. Featuring a small foot print and ergonomic design, it takes up minimal counter space, keeping your counters clutter free.

Hypercom® Optimum T4210

Simple & Easy to Use

- 19 key ATM-style interface ensures ease of use
- Lightening fast integrated printer with drop-in paper loading virtually eliminates paper jams
- Small footprint minimizes use of counter space

Fast, Efficient & Secure

- High-speed modem for fast transactions and downloads
- Large memory capacity, it's prepared for your growing needs
- Fully compliant with all standards and security requirements

Support For All Payment Types

- An integrated PIN pad supports debit and EBT transactions, or add an external PIN pad for easier customer use
- Supports solutions such as gift card and dynamic currency conversion – increases your revenue and level of customer service
- Adding a check imager turns checks into electronic transactions, making check acceptance safe and easy while expediting your cash flow
- With the addition of a contactless chip reader you can also accept transactions from credit cards or devices, such as cell phones, that have embedded radio frequency chips
- Where applicable, it can support the No Signature Program helping to minimize check out times

Affordable Dial Solution Without Limits
