THE COMPUTER IS PERSONAL AGAIN.

HP iPAQ 210 ENTERPRISE HANDHELD

Mobilize your business process. Maximize your results.

Designed for the enterprise, the HP iPAQ 210 Enterprise Handheld can help you solve specific business problems and meet today's mobility needs.

Power-built for enterprise
There is much to appreciate about the sophisticated design of the HP iPAQ 210 Enterprise Handheld: the large 4" VGA touch screen display for improved visibility in a variety of environments, a long life battery to support the powerful 624MHz processor, the robust SDIO expansion and the convenient I/O of headphone, microphone, voice record and USB. You'll also enjoy the standard Microsoft Office Mobile® suite of Word, Excel and PowerPoint and the ability to easily synchronize Office Outlook Mobile. Integrated IEEE 802.11 b/g and Bluetooth® 2.0 wireless networking allows internet and email access at the office or other Wi-Fi hot spots in airports, cafes and hotels[1,2] via mini-USB or Wi-Fi connectivity.[1]

Powerful mobile solutions go beyond the device
HP, a global leader in technology, services and support, understands the need for businesses to integrate the right mobile solutions easily while keeping costs down. Our mobile devices are certainly impressive—but they're just a small piece of the challenging puzzle that is your enterprise mobility program. Your business runs on key applications. Your proprietary data is irreplaceable and must be protected. Your IT effort that goes into testing, approval, deployment and remote management is enormous.

HP can help you deploy and support your mobility strategy—from device-level support, to customized ROM development, to enterprise device management solutions. Ask HP about these services and if they are right for your business.

Think mobile. Think global. Think HP.

HP iPAQ 210 ENTERPRISE HANDHELD
