

The V-Tag Smart Gateway Exterior Unit receives messages from individual V-Tag tags and forwards them to the user's network for storage in a database or display to a user. The V-Tag system provides two installation options. One option is to deploy V-Tag as a turnkey system using InfinID Technologies AssetWorx! software, which is a fully featured asset management system. Another option is to use the V-Tag SDK (Software Development Kit) to integrate V-Tag with any third party software system.

## Specification Sheet

### Model INF-VT100-E-G

#### V-Tag Model INF-VT100-E-G V-Tag Smart Gateway, Exterior

Power Consumption	1.9 Watts (max.)
Interface	Ethernet, Wi-Fi
Dimensions	12 in x 10 in x 5 in
Weight	50 Oz
Frequency Band	2.4 GHz
Certifications	FCC Part 15C – Low Power Transceiver / CE
Ingress Protection Rating	IP 66
