

The V-Tag Smart Gateway Unit receives messages from individual V-Tag tags and forwards them to the user's network for storage in a database or display to a user. The V-Tag system provides two installation options. One option is to deploy V-Tag as a turnkey system using InfinID Technologies AssetWorx! software, which is a fully featured asset management system. Another option is to use the V-Tag SDK (Software Development Kit) to integrate V-Tag with any third party software system.

Specification Sheet Model INF-VT100-G

V-Tag Model INF-VT100-G Smart Gateway

Power Consumption	1.9 Watts (max.)
Interface	Ethernet, Wi-Fi
Dimensions	4.5 in x 3.5 in x 1 in
Weight	3.5 Oz
Frequency Band	2.4 GHz
Certifications	FCC Part 15C – Low Power Transceiver / CE
Ingress Protection Rating	IP 63
