SMART Wi-Fi

Monitor and control your home network. Anywhere. Anytime.

The Linksys AC1200+ Smart Wi-Fi Gigabit Router features high-speed Wireless-AC technology and Smart Wi-Fi software to deliver next-generation home network performance.

Engineered for the well-connected household, the Linksys AC1200+ Dual Band Smart Wi-Fi Gigabit Router brings next-generation wireless speed to all your devices. Featuring USB 3.0 and four Gigabit ports along with the latest Wireless-AC technology, the AC1200+ is optimized to support all wired and Wi-Fi® devices. Leveraging dual bands with up to N300 Mbps + AC867 Mbps, data traffic can flow quickly and with minimal buffering—meaning gaming, media streaming and general Internet activities can occur simultaneously with no interruptions.

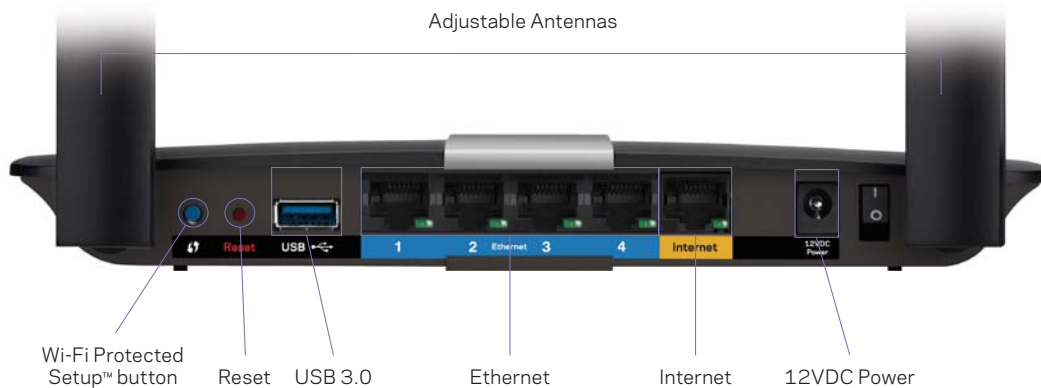

The AC1200+ comes equipped with Smart Wi-Fi software, allowing users to monitor and control their home network from anywhere, anytime, using a smartphone. The Smart Wi-Fi feature allows users to see what devices are on the network, block devices from Internet access or specific websites, create a password-protected guest network and more.

Key Features and Benefits

- **Up to 2.8 times* faster than Wireless-N technology:** Simultaneous dual-band speed up to N300 Mbps (2.4 GHz) + AC867 Mbps (5 GHz)* for media-intensive applications
- **USB 3.0 port:** USB 3.0* and Gigabit Ethernet ports ensure ultimate media streaming and fast data transfer of photos, video, data files or connecting devices across your network. USB 3.0 is 10 times faster than USB 2.0.
- **Linksys Smart Wi-Fi:** Monitor and control a home network from anywhere and at any time. Smart Wi-Fi allows users to prioritize devices or websites, gain parental control over inappropriate content, monitor network activity, turn Wi-Fi access on or off, and create select password-protected guest networks.
- **Smart Wi-Fi apps:** A growing suite of apps offers improved opportunities to control one's home network
- **Easy setup:** Simple installation requires no CD

* Up to 2.8x faster physical data rate when compared to 802.11n Wi-Fi routers using two antennas to transmit and receive data. Actual speeds will vary depending on a number of factors. In order to achieve the best performance, router must be used with a compatible AC867 wireless device.

*The standard transmission rates—300 Mbps or 867 Mbps (for 5 GHz), 300 Mbps (for 2.4 GHz), 54 Mbps, and 11 Mbps—are the physical data rates. Actual data throughput will be lower and may depend on the mix of wireless products used and external factors.

*May require a software/firmware update available for download at linksys.com/support.
