Engineered for speed and accuracy, the MS-520 high speed scan head touts an impressive scan rate of 900 scans per second. It outputs a digitized signal ready for decoding, and connects to a Microscan MS-3000 decoder via an 8 -pin modular connector and cable. Integral to the MS-520's exceptional performance capabilities and operating life is its maintenance-free, durable, brushless DC motor. The Microscan MS-520 scan head is ideal for systems that require precise, high speed automated bar code data acquisition, including clinical, photofinishing, document handling, and electronics manufacturing applications.

## HIGH SPEED BAR CODE SCAN HEAD

High Speed Scanning: A spinning, 10-sided mirror delivers reliable, redundant scanning of fast moving labels. The MS-520's laser beam is reflected through a $60^{\circ}$ arc up to 900 times per second along a single line or $2^{\circ}$ raster.

Easy Decoder Connection: Direct connection to the Microscan MS-3000 decoder, which provides real-time decoding and instantaneous data transmission to the host computer, is supplied via an 8 -pin modular connector and cable.

Versatile Mounting: Built-in mounting holes allow for easy and quick positioning of the MS-520 scan head, whether using a mounting plate or a Microscan Universal Stand"' (available in 4-inch, 6 -inch, or 10 -inch heights). The cube-shape, coupled with a wide scan angle and large depth of field further expands positioning options.

Brushless DC Motor: An exceptionally durable, brushless motor is used to maximize the life of the scan head. A solid performer, this maintenance-free motor precisely spins the scanning mirror at the user selected rate, which can reach 900 scans per second.

Wide-angle Photodetector: The double-window photodetector allows the MS-520 to capture more reflected light (from a wide, $60^{\circ}$ scan angle), and thereby delivers greater scanning accuracy.
Microscan's proprietary light-pipe transmits light to a pair of photodiodes that convert light energy into an analog electrical wave that is digitized and transmitted to the decoder.

Service options:

- Installation assistance program
- Service agreements
- Training
- On-site service

Symbologies: The MS-520 scans virtually all widely used bar code symbologies, including:

- Code 39 - Codabar
- Interleaved 2 of 5 • UPC/EAN
- Code 128 - Code 49
- Other codes are available, call Microscan for details.

## MS-520 HIGH SPEED SCAN HEAD <br> SPECIFICATIONS AND OPTIONS

## MECHANICAL

## Bottom

ENVIRONMENTAL
Weight: 8 oz. ( 227 g )
Operating temperature:
Visible: $32^{\circ}$ to $104^{\circ} \mathrm{F}\left(0^{\circ}\right.$ to $\left.40^{\circ} \mathrm{C}\right)$
Infrared: $32^{\circ}$ to $113^{\circ} \mathrm{F}\left(0^{\circ}\right.$ to $45^{\circ} \mathrm{C}$ )
Humidity: Up to $95 \%$ (non-condensing)

## Ambient light immunity:

- 450 foot candles (indoor, fluorescent, in candescent, mercury vapor, sodium vapor)
- 2000 foot candles (soft indoor)

LASER LIGHT
Type: Semiconductor visible laser diode ( 670 nm nominal), Infrared Class I version available
Safety class: CDRH Class II (670 nm), CDRH Class I (780 nm)

SCANNING PARAMETERS
Mirror type: Rotating 10 -faceted
Optional raster mirror image: 10 raster scan lines over a 2 -degree arc (or 0.24 inch raster over a 6 -inch distance)

** At 4.25 inches ( 10.8 cm ).

Scan rate: up to 330 scans per second
(900 SPS optional)
Pitch: $\pm 50^{\circ}$
Skew: $\pm 40^{\circ}$
Label contrast: $25 \%$ min. absolute dark to light differential at 670 nm wavelength
DECODER INTERFACE
Compatible with Microscan MS-3000 decoder
Port: output socket for 8-pin RJ-45
modular connector
Cabling: 6 -foot cable standard; available in 1 -foot increments to 15 feet

## ELECTRICAL

## Power requirements:

+12 VDC @ 50 mA maximum - 12 VDC @ 35 mA maximum
+5 VDC @ $240 \mathrm{~mA}(330 \mathrm{sps})$ or 340 mA (900 sps)
Input signals: TLL high enable for laser diode and motor (controlled by decoder software)
