Comprehensive Solutions for Warehouse Management

Warehouse Manager In-a-Box | Inventory Management offers warehouse managers a fixed asset tracking system made easy! In the warehouse, asset tracking can include the materials on shelves as well as warehouse equipment such as forklifts, conveyors and other material handling equipment. Utilizing a Motorola ET1 and RedBeam Software, personnel can easily capture important information about each asset and ensure the security of company property. Key features and benefits include:

- Increased asset utilization and uptime
- Higher technician productivity
- Reduced asset maintenance and repair costs
- Proper regulatory compliance and tax treatment for assets

Warehouse Manager In-a-Box | Inventory Management streamlines inventory and asset management to give Managers better visibility and control.

Warehouse Manager In-a-Box | Inventory Management is available exclusively at BlueStar!
