Comprehensive Solutions for Mobile Video Surveillance and Security

Warehouse Manager | Mobile Surveillance brings a fresh approach to video monitoring and recording. Our purpose-built solution addresses the demands of large warehouse environments storing dangerous, valuable or sensitive materials. By combining the latest in video surveillance with a wireless local area network engineered for mobility, warehouse managers can move the command post to a ruggedized tablet and respond to alerts remotely.

This comprehensive solution is designed to:

- Ensure compliance with safety regulations
- Improve Productivity
- Reduce Theft
- Provide Critical Visual Evidence

Warehouse Managers can now view live and recorded events en route, better protecting their businesses, assets and employees.

Warehouse Manager In-a-Box | Mobile Surveillance is available exclusively at BlueStar!
