

NiceLabel

Enter the world of online labeling

NiceLabel Portal

Move your labeling software to the web
and experience the possibilities:

- Receive shipments labeled to your specification
- Unify and centralize your label printing systems

www.nicelabel.com

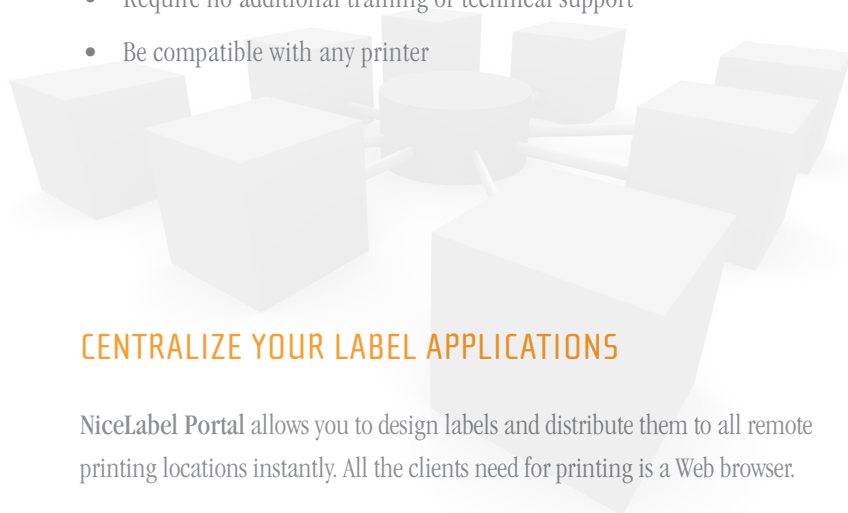

STREAMLINE YOUR RECEIVING PROCESS

In order for all your units from suppliers to arrive with labels according to your specifications, **NiceLabel Portal** lets you create a system that suppliers use to easily print the labels that you want.

NiceLabel Portal is a solution which lets you provide your supplier with a printing system, that will:

- Be accessed through a regular Web browser
- Use your label format
- Include a simple and clear data entry form you design
- Require no additional training or technical support
- Be compatible with any printer

CENTRALIZE YOUR LABEL APPLICATIONS

NiceLabel Portal allows you to design labels and distribute them to all remote printing locations instantly. All the clients need for printing is a Web browser.

A centralized system extends the benefits of Web applications to the labeling process:

- No desktop application installations or maintenance
- Complete printer independence
- Unified label designs used by all printing locations
- Changes of unified labels can be extended to all locations at once

COMPLIANT VENDOR PRINTING

Provide a one-click labeling solution according to your needs and specifications to your vendors.

ENTERPRISE LABELING

Manage all label and Web form designs centrally and make any label changes in moments. Central management of all labeling operations also reduces training and support costs to a minimum.
