

PMPU1000

System Management Server

PRODUCT FEATURES

- IP, hybrid and analog system capability
- Satellite feature allows 64 PMPU1000 to form a global system with universal cross network access
- Supports up to 1,024 alarms inputs and various alarm source type and management
- Supports up to 1,024 event schedules
- Flexible system design
- 32 simultaneous operators per local server
- Operator management, priority, access and timer executed restrictions
- User-friendly administrator console
- 3x Built-in network interfaces (1000Base-T)

OPTIONAL COMPONENTS

- PFW950 - GUI client software
- SDK for third party applications

actual product appearance may vary

DESCRIPTION

The PMPU1000 System Management Server provides flexibility and scalability for a range of video networking needs, up to and including creation of a global system with universal cross-network access to video. The unit manages a video surveillance system with the ability to mix analog and IP devices. It also offers a satellite feature enabling 64 stand-alone servers to work together on an enterprise level.

The PMPU1000 can handle up to 1,024 cameras and 512 monitors in an IP, analog or hybrid configuration, and supports up to 1,024 alarm inputs with up to 1,024 event schedules. The system supports Panasonic's PFW950 GUI client software.

Contact your local Panasonic representative to assist you with your system design.

Maximum Size per PMPU1000 Server

	IP	Hybrid	Analog
Cameras	512	Consult Panasonic for system design	512
