Super Dynamic III
Color Surveillance Cameras
WV-CP480 Series

Lens : optional

Now with Auto Back Focus, for Perfect Focus 24 Hours a Day

Panasonic introduces the new WV-CP480 Series *Super Dynamic III* cameras, equipped with Auto Back Focus (ABF). When these cameras switch from color to B/W mode, the cameras automatically make micron-order adjustments in CCD position to achieve precise back focus. The new Auto Back Focus (ABF) technology ensures delivery of clear, sharp, perfectly focused images 24-hours a day, automatically.

The new Pixel Based 128x Dynamic Range Correction adjusts automatically to moment-to-moment changes in contrast, making it possible to view subjects accurately in all areas and positions, thanks to area free natural contrast image correction. Horizontal resolution of 540 lines (typical) in color mode, and 570 lines in B/W mode, a dramatic improvement in color reproduction. With the optional F1.2 lens, clear images can be captured in lighting as low as 0.5 lux (0.05 fc) for color or 0.06 lux (0.006 fc) for B/W. Adaptive Digital Noise Reduction eliminates streaking in darker images.

Additional intelligent features include Auto Image Stabilizer to eliminate blurring and Scene Change Detection to warn of attempts to interfere with cameras.

The new WV-CP480 Series is ideal for a wide range of applications, offering 24-hour surveillance with imaging that delivers unprecedented, true-to-life realism.

KEY FEATURES

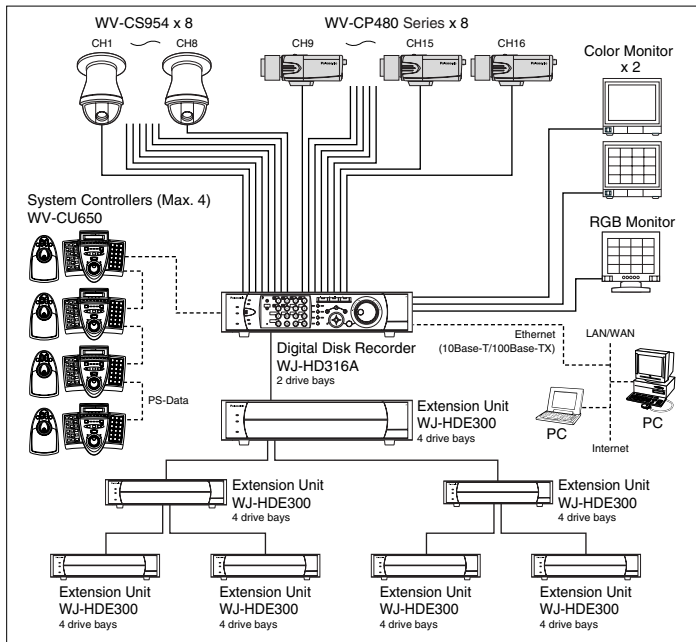

- 1/3-type double speed CCD color image sensor.
- The new Pixel Based 128x Dynamic Range with area free natural contrast image correction adjusts moment-to-moment changes in contrast to view subjects accurately in all areas and positions.
- Switches from selected color mode to B/W mode, automatically or manually.

- Higher horizontal resolution of 540-line (typical) at color mode, and 570-line at B/W mode.
- Minimum illumination:
 - 0.5 lux (0.05 fc) at color mode, 0.06 lux (0.006 fc) at B/W mode, at F1.2 optional lens
