Die-cast aluminum body Shock Resistant

With a body made of die-cast aluminum and a dome made of 3.5mm thick polycarbonate, these cameras are tough enough to resist severe shocks.

The camera lens unit has a spring structure, so the chassis can withstand external shocks.

IP66 approved Rain and Wind Resistant

Meet IP66 international standards. With excellent dust and moisture resistant capabilities these cameras can be used outdoors, under building eaves.

Heater Unit: WV-CW3H (Optional) Ideal for Varying Temperatures

The optional heater unit adjusts automatically to temperature fluctuations, helping to prevent dew condensation.

High Performance in a Rugged Body.

Panasonic's new Vandal Proof Super Dynamic II Color Cameras. The WV-CW474A Series are not only rugged and loaded with high-performance features, they are also easy to install. Highly resistant to dust, moisture and shock these units satisfy international standards. The WV-CW474A Series include high image quality, increased sensitivity, day/night switching for 24-hour surveillance and a multi-function motion detector. Free from conventional limitations on placement, application and objective, these multipurpose color cameras are ideal for numerous surveillance applications.

Feature Loaded Simple to Install

Single-camera 24-hour surveillance Day/Night Switching

To allow 24-hour surveillance, these cameras (in high-sensitivity mode) sense darkness and switch automatically from daytime color to nighttime black-and-white with duration and timer setting to meet exact installation requirements. They can also be switched from color to black-and-white manually.

Day (Color mode) Night (B/W mode) at low-light condition

Day/Night switching

Full-color images at 0.8lux* (0.08fc*) Black-and-white images at 0.1lux* (0.01fc*)

These cameras support full-color surveillance in low-light situations like this parking lot, switching to black-and-white allows surveillance in light as low as 0.1lux (0.01fc) with optional clear dome cover; WV-CW2C. IR response down to 0.00lux is valid. 10x auto electronic sensitivity up is also supported (in fixed mode 32x available).

510-line horizontal resolution in color mode

Equipped with a powerful 768(H) x 494(V) 1/3-type CCD, these cameras deliver beautifully clear images with 510 lines (at High) and 480 lines horizontal resolution at color imaging, and 570 lines at B/W mode.

2x variable-focal lens is standard equipment

Equipped with a 2x variable-focal lens plus an additional 2x electronic zoom, these cameras can view their subjects in greater details.

With Super Dynamic II, backlighting is no problem

With a 64 times dynamic range, Panasonic's proprietary Super Dynamic II processing yields clear images even in high-contrast or backlit lighting situations.

Set the lens aperture to the bright section, and the dark section is invisible.

Digital signal technology allows images with high contrast to be seen on screen.

Digital Motion Detector senses movement and sends an alarm signal

When the Motion Detector senses movement in the monitored image, it automatically sends an alarm signal to the system. When linked to a recording device, it provides an efficient way to avoid missed images.

(Turns white only in demo mode)

Character displays title

The monitor can display title up to 16 roman letters or numbers. By allowing instant identification of pre-set camera locations, this feature can help prevent errors during emergency situations.

Photographs were taken for the purpose of explanation; actual images may differ.

Proprietary 3-D hinge makes adjustments easy

The 3-dimensional hinge (Pan, Tilt and Azimuth) allows the camera to be rotated as well as moved horizontally and vertically. Digital signal processing allows the image itself to be shifted up, down, left, right, or inverted. Choose precisely the camera angle you need; no camera makes it easier.

Pan 320 degrees Tilt 150 degrees Azimuth 320 degrees

Accepts both 24V AC and 12V DC power in a single unit

WV-CW474A Series accept both 24V AC and 12V DC with a single cable terminal. This unique capability enables simple model selection and easy installation.

Basic settings couldn't be simpler

Simple dipswitches control Soft/Sharp, Day/Night: Off/Auto and other basic settings. A compact monitor-out terminal with a small liquid crystal display allows you to check settings on the spot.

Easily installs in existing electronic junction box

The Flush Mount Type WV-CW474AF can be installed in existing two gang junction box.
