WV-NP244

Lens : optional

MPEG-4 JPEG

MPEG-4 & JPEG Dual Stream. Plus, PoE (Power over Ethernet) for Easy Installation.

Panasonic introduces the new WV-NP244 network camera that is both MPEG-4 and JPEG dual stream compatible. MPEG-4 makes viewing video smooth and seamless, and is multicast/unicast switchable to fit your application. When using JPEG, 640 x 480 (VGA) images can be transmitted at up to 30 fps. Plus, with progressive scan in both MPEG-4 and JPEG modes, images of moving subjects are captured in high fidelity. With the optional F1.2 lens, these cameras operate in lighting as low as 1.1 lux (0.11 fc). In addition electronic sensitivity can be increased up to 16 times, while a 3x digital zoom allows you to view subjects' up-close. A built-in high sensitivity microphone with on/off functionality provides clear audio capabilities.

The WV-NP244 is equipped with PoE (Power over Ethernet) IEEE802.3af, allowing power and signals to be transmitted over the same cable, thus eliminating the need to install a separate power source for each camera. This feature makes installation as simple as plugging the cable into the HUB. Using the multi screen display mode, up to 8 cameras can be monitored from a single browser. The digital motion detector feature transmits an alarm signal when moving subjects enter the scene. When combined with the optional Network Disk Recorder; WJ-ND300, these cameras make it incredibly easy to construct an automatic video surveillance system. Plus, the SD memory card slot allows you to back up images on an SD memory card in case of network failure.

So handy and so reliable, the WV-NP244 is ideal for an endless variety of networked surveillance applications.
