

Integrated LCD Touch

POS Terminal PT-5500

Strength in Simplicity —

Meet the budget and satisfy the requirements

PARTNER

The PT-5500 represents the next generation of intelligent Point of Sale terminals offered by Partner Tech.

Equipped with a low power consuming VIA Eden Processor, the PT-5500 can be used as either a thin-client or stand alone networked unit. By eliminating moving parts such as the CPU fan and power supply fan, maintenance costs are reduced and reliability is increased. Combining these features together provides a high Return on Investment of an already attractively priced unit.

The PT-5500 is fitted with a large 15-inch LCD Touch Screen while maintaining a small footprint. Together with a high viewing angle of 60 degrees and adjustable screen, this PT-5500 can be located virtually anywhere - even for wall mounted applications.

A host of standard features plus a wide variety of expansion options and peripherals allow easy configuration of the PT-5500 tailored to your Point of Sale application requirements.

Partner Tech offers a complete line of integrated Point of Sale Terminals and Peripherals to accommodate all your needs and challenges of today's demanding business requirements.
