**RX900 from Primera is the world's first on-demand color RFID label printer.** Utilizing the latest in high-resolution color inkjet technology, it prints labels and tags at speeds of up to 4.5" (114mm) per second.

RX900 is a true "on demand" printer, which means that it prints, encodes, verifies and dispenses labels one at a time. You can make exactly the number of full-color labels you need when and where you need them.

The built-in UHF reader/encoder module, supplied by RFID industry leader Intermec<sup>®</sup>, supports ISO 18000-6B, ISO 18000-6C and EPC Global Class 1 Gen 2. The printer is thus ideal for producing full-color, RFID-enabled labels and tags for file folders, asset tracking, garment tags, shipping labels and much more.

Labels from 1" (25.4mm) wide up to 8.5" (216mm) wide can be produced. An adjustable antenna position and variable gain settings allow you to precisely aim the RFID signal, ensuring that only one label at a time is written.

For more information and sample printed and encoded labels, call 1-800-797-2772. Email to sales@primera.com or visit **www.primeralabel.com/RFID.**
