

# Fixed asset tracking made easy.

Eliminate messy spreadsheets, streamline physical inventories, and take control of your organization's valuable property.

Track computers, equipment, furniture, vehicles, and other valuable assets using this comprehensive cloud-based asset tracking solution.

This tested and proven asset tracking solution integrates best asset tracking practices: barcoding, detailed record-keeping, and reporting capability into one powerful system. Ideal for businesses and organizations that need to track 500 or more fixed assets, the solution provides a complete fixed asset database, the ability to easily keep asset records up to date, and streamline the physical inventory process by up to 70%.

Easily capture important information about each asset, including barcode ID, location, department, status, purchasing, and user-definable fields. Use your Android or iOS smartphone or tablet to add and manage your fixed assets on the fly.

Barcode technology dramatically streamlines the physical inventory process. Use enterprise mobile devices for scan-intensive activities like conducting annual audits.

Barcode technology streamlines the physical inventory process significantly. Using enterprise mobile devices, simply select your location, scan the assets in that room, and move on to the next room. If an asset is new or has moved, the system will let you know. When finished, you see right away if you've missed any assets to prevent you from having to go back later.

RedBeam Asset Tracking is used by all types of organizations, including state, local, and federal government agencies, single site and multi-site companies, and other entities that need to track assets and capital equipment. RedBeam makes it easier than ever to keep asset records up to date.

Whether you have 500 or 50,000 assets, RedBeam Asset Tracking is the solution you're looking for!
