

Fixed Assets™

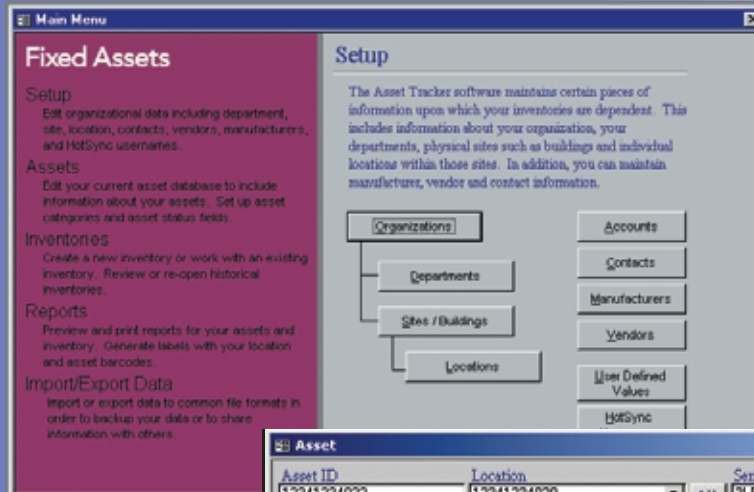

Take control of your fixed assets with this fully automated barcode system from RioScan™

Working with the Asset Database

Once you have set up all of your supporting information (departments, locations, etc.), you are ready to begin working with your asset records.

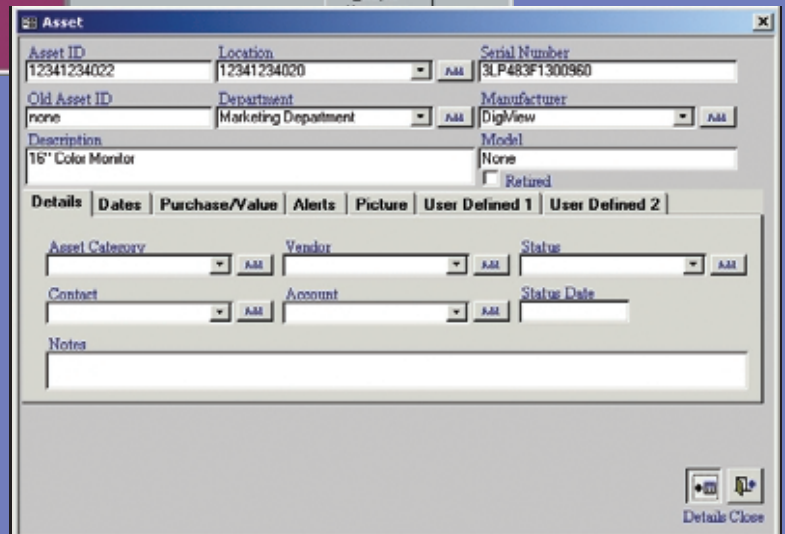

Easy-to-navigate main menu screen.

The PC database helps you manage your assets and stores an extensive amount of information on each one.

The easiest method for collecting asset information is to use the Fixed Assets palm-based PDA software. The PDA user interface has been optimized to simplify and speed up the data collection process, while maintaining powerful features and flexibility.

The Asset Info screen stores a great deal of information about every asset.

Fixed Assets™

Take control of your fixed assets with this fully automated barcode system from RioScan™.

PRODUCT FEATURES

- Complete barcode-based asset management solution
- One-touch data synchronization
- Flexible import/export ability
- Works with a wide variety of existing barcodes and property tags
- Fast, easy database features like find and one-touch sorting
- "Zero training" handheld software
- Inventory items are automatically moved to the location in which they are found
- Flag items that need attention
- Tamper-resistant labels that cannot be removed without tearing
- Individual handheld IDs mean that you can track accountability

COMPREHENSIVE REPORTING

Dozens of built-in reports assist you to maintain your asset database and track down missing inventory. Create custom reports in minutes using the Microsoft® Access report wizard (Microsoft® Access required for custom reporting).

Fixed Assets™ helps you meet corporate audit and regulatory requirements while saving time and money.
