

Presenting a premium experience for developers.

CHG70 Series Gaming and Video Monitors

For high-level game development, video creation or any professional who works with fast-moving content, the CHG70 Series is a superior solution. The curved VA Panel, QHD resolution, 600-nit ultra-brightness, Quantum Dot technology, HDR, 1.07B colors and factory calibration all contribute to stunning, detailed, lifelike images. Game play, video and general content movement are fast and smooth due to 1ms response rate, 144hz refresh rate and AMD FreeSync 2. Game Modes, Black Equalizer, Low Input Lag Mode, a gaming user interface and Arena Lighting all optimize the gaming and video experience, for more detailed and accurate content development.

Key Features

Ultra-Curved VA Panel, QHD Resolution, 600 Nits

With an 1800mm-radius, super-curved VA panel, the distance from screen to eye is more uniform, resulting in less eye fatigue. QHD resolution and 600 nits brightness deliver stunning picture quality.

Quantum Dot (Q-LED) Panel, sRGB and 1.07B Colors

Quantum Dot technology supports up to 125% sRGB color space and 1.07B colors, for brighter and crisper images, with more natural reds and greens. And every monitor is factory-calibrated for extreme accuracy.

High Dynamic Range (HDR) and 3,000:1 Contrast Ratio

HDR provides a higher level of contrast between light and dark images. Combined with a best-in-class 3000:1 contrast ratio, bright colors share the screen with deep shadows and silhouettes.

144hz Refresh Rate, 1ms Response Time, FreeSync 2

Advanced technologies work together to deliver a smooth and crisp presentation of fast-moving content, help eliminate blurring, ghosting and juddering, and reduce lag for gaming and video content.

Game Modes, Black Equalizer and Low Input Lag Mode

Black gamma, sharpness, contrast and color tune are customizable with 4 different Game Modes (FPS, RPG, RTS, AOS). Samsung Black Equalizer has 20 different dark level values, and Low Input Mode maximizes keyboard and mouse response times.

Gaming User Interface and Arena Lighting

Equipped with a modern gaming GUI with a 5-way joystick and 3 hot keys to save game settings. Audio-aligned Arena Lighting, located at the back of the monitor, adds to the thrill of gaming.

Dual Hinge Stand, Easy on the Eyes, VESA

The dual-hinge stand swivels, tilts, pivots and is height-adjustable. Eye strain is reduced with Flicker Free technology and Eye Saver mode. And VESA compatibility makes installation on a wall or mounting arm easy.

Samsung CHG70 Series Desktop Monitors
