SCC-931T

1/4" ANTI VANDAL DOME CAMERA

SUMMARY

The SCC-931T is an intelligent series camera (IC Series) and remotely controllable imaging devices. The combination of superior imaging and anti-vandal housing assemblies make the SCC-931T a natural addition to areas that require additional protection. Remote control and programming is accomplished via an RS-485 (half duplex) network, which allows all cameras in the IC Series to be controlled and communicate. The SCC-931T can be used stand-alone or can be added to existing Samsung dome systems where complete remote control of zoom and camera functions are desired. The SCC-931T is waterproof, dustproof and shockproof and combines a X12 time optical zoom with a X10 digital zoom to yield X120 zoom capability. The SCC-931T is the ultimate vandal resistant vari-focal dome! With 480 lines of resolution, a signal to noise ratio of more than 50 dB and minimum scene illumination of .01 lux, the SCC-931T is a natural choice for systems integration and surveillance projects. With the addition of the Samsung network equipment, the SCC-931T can be converted into an IP addressable device and can be viewed or controlled remotely via intranet or internet. The IC Series (Intelligent Camera) from Samsung Electronics are the professional's choice for systems integration. Full control capability, remote access, IP modules and a variety of housing and mounting options make the IC series the new standard of professional surveillance.
