Percent Daily Values (DV) are based on a 2,000 calorie diet.

"We knew we had a great and unique product. But, how to get it to market? With over 30 products, we would have had to have 3,000 – 5,000 labels printed per product...that was \$15,000 we didn't have. We looked at several food labeling systems at the various food shows. But even then, we were looking at about a \$5,000 + investment.

TPGTEX set us up with their Food Labeling system, printer and shell labels for a very affordable price. Ever since we started using the TPGTEX Label System, our Wholesale business has skyrocketed! "

Mike Mercado

Brazos River Provisions Company

Add-On

- Full Label Design Program
- Printer
- Labels
- Ribbons
- Scanner

Print labels for your entire product line on the fly!

713.726.9636. Email us: sales@tpgtex.com or visit us on the web: www.tpgtex.com

3 SIMPLE STEPS

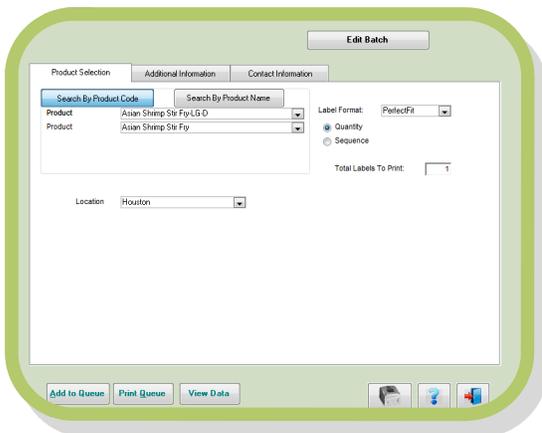

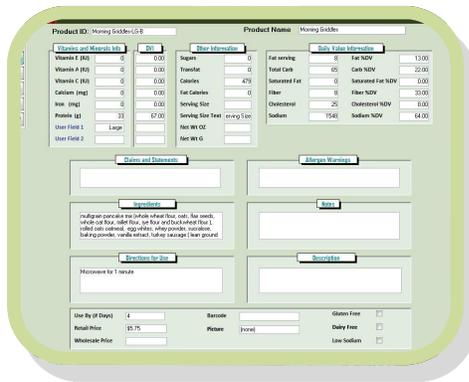

Step one

Go to your Product

Manager or to Print Labels

Step Two

Enter information or edit product information

Step Three

Tell the program how many labels you want.

Optional—Add Print time information

Result:

Easy to read Product label with barcode.

CASE STUDY:

PRINT ON DEMAND USING THE FOOD LABEL APPLICATION

Requirements/Needs:

- Reduce label printing costs
- Reduce number of labels needing to store in inventory
- Allow additional products to be created and tested without increasing labeling costs
- Allow private labeling
- User Friendly

Solution:

Provided company with our Food Label system. The program hold all product information. All product labels were analyzed and grouped by design and size. As a result of the analysis it was determined that only two label templates needed to be created. These templates covered all needed sizes for all products. Our design team together with our programmers, created the label templates, effectively reducing the number of labels from 80 (two sizes for 40 different products) to 2. The labels were designed to pull all needed information as well additional user fields - unique to each label template. All needed FDA required information was incorporated where appropriate. The system was installed in only 30 minutes. All employees were trained and started using the Food Label system immediately.

Conclusion:

The company now estimates that it saves every year hundreds of man hours and several thousand dollars in label printing, design and modifications.

The owner reported increased sales (25%) due to private labeling and the ability to introduce new products without increasing costs.

Printers, Labels, Ribbons and Scanners

We offer high quality products. Our printers and scanners come with 3 years warranty at very competitive prices.

INCREASE SALES AND REDUCE COSTS

How Can You Reduce Costs?

Costs Associated with Labeling:

- **Quantity of labels:** It is no secret that you need to order a large quantity of labels in order to get a reasonable price per label.
- **Wastage:** Many of the labels you order never get used. The reasons can vary from a discontinued product to changes of information. (change of ingredients, package size or even address)
- **New Product Market Testing:** When you try a new product or a new size for a product, you need to order thousands of labels, even if this is only an experiment.
- **Plate Charges:** Every time you order new labels, you need to pay for plate charges, as well as other charges such as Art Work, Design Work, Etc.

You can reduce all these cost by switching to pre-printed shell labels.

Eliminate:

1. **Waste** - You will be able to use the same label for all your products.
 2. **Market Testing Costs** - Now you can test new products, but do not have to order special labels. Test 5 or test 100, use your existing labels to try new combinations and new products.
 3. **Printing Costs** - You will only have to pay one time fee for your plate charge. Since all your labels are the same, you no longer have to pay each time you want to add a product or make any changes to product information.
-

How Can you Increase Sales?

Private Label your Products - All the information now resides in your Food Label System. **Now you have the ability to print to ANY label!**

New Products - Try new products, test how well they do and start selling those.

These are just two simple ways to increase revenues by opening new markets for your products.

Impress your customers with a professional Primary label. Learn how you too can have the look of the big guys at fraction of the cost.
