## > B-EV4 Desktops

#### > TRUST TOSHIBA

Exciting and refreshing product advances, superior build quality and reliability, all backed up by an extensive support network, Toshiba thermal printers are the choice across the world for professional labeling.

#### > OPTIONS / UPGRADES

- Peel-off module
- Full or partial cutter
- SD card to expand onboard memory
- External media holder
- Standalone keyboard
- Linerless kit & cutter (DT model)
- Power cable tray for retail installations

#### **USER BENEFITS**

- Compact professional label printing
- Design and print straight from a PC
- 203 or 300dpi print resolution models
- Slots straight into existing systems
- Legendary build quality in a tough plastic case

The Toshiba B-EV4 –

Fast and easy on-demand desktop labeling.

## **B-EV4 DESKTOPS**

Affordable & Effortless Printing for Every Business

For fast, on-demand labeling and ticketing direct from your desktop, look no further than the trustworthy B-EV4 range from Toshiba. With market-leading features, exceptional build quality and reliability, produce professional labels quickly and easily at the touch of a button.

### **B-EV4**

#### **APPLICATIONS**

With its remarkable versatility, as well as supreme reliability and ease of use, the B-EV4 range is trusted worldwide in a diverse range of sectors.

- Office administration
- Warehousing & logistics
- Couriers & transportation
- Airports & railways
- Postal services & depots
- Retail stores & supermarkets
- ▶ Hospitality & leisure ticketing
- Cinemas, theatres & museums
- Amusement parks
- Sports centres
- Hospitals & surgeries
- Laboratories & pharmaceuticals

# LABELS & TICKETS ON DEMAND FROM YOUR DESKTOP

The B-EV4 series utilizes the most advanced technology in its construction, connectivity and usability, making it a perfect printing solution. Trust Toshiba.

With a wealth of long-term experience and knowledge, Toshiba consistently produces thermal printing innovations for all your business-critical applications.

#### > COMPACT & CONVENIENT

Developed to fit into limited work spaces in many industries and applications, the B-EV4 is ready whenever it's required.

Using the latest 32-bit Toshiba processing technology, it gives rapid on-demand printing at speeds of up to 5 inches a second.

#### > TAKE CONTROL

Design and print straight from a PC using Windows® drivers and free Bartender Ultralite software. Print tickets and labels from 25.4 mm up to a market-leading 995 mm.

#### > FLEXIBLE MODELS

The direct thermal model (B-EV4D) is suitable for short-term ticketing and labeling using thermal papers whereas the B-EV4T also uses thermal ribbons for more hard-wearing items. Both types have a choice of print resolution, 203 dpi for everyday uses or 300 dpi for specialized barcodes and graphics.

#### > DESIGNED TO PERFORM

Precision engineered, this 108mm (4.25") thermal printer has a robust double-walled plastic cover to protect the inside against dust and external damage, giving you perfect results every time.

With easy access to the printhead, paper path and sensors, paper or label rolls are loaded with ease, and the spring-loaded media holder automatically centers the paper.

#### ➤ COMPATIBILITY

Alongside the latest high speed 12 mbps USB and 10/100 mbps LAN interfaces, serial and parallel connections allow the B-EV4 range of printers to simply slot into working legacy systems without software or driver changes.

Whether replacing an existing product, or simply adding to your current properties, upgrading your printer technology has never been so easy.

A wide range of options, including an external media stand

An optional power supply tray for retail installations

Built-in networking as standard with a 10/100Mbps LAN interface

#### > RIBBON RANGES

Approved Toshiba thermal transfer ribbons are relied on daily by businesses the world over to produce vital labeling for a huge variety of applications.

B-EV4 ribbons are available in various grades and qualities to suit virtually any application in every market, from mass-produced short-term label printing to highly specialized identification techniques using advanced resin products.
