

- Indoor/outdoor installations
- Stainless steel screws
- Black epoxy powder painted
- Weatherproof standard IP66 (IR50) and IP65 (IR300)

The infrared illuminators from Videotec allow the generation of high quality images during the night surveillance to TVCC cameras sensitive to infrared rays.

IR infrared illuminators are made from die-cast aluminium; painted with epoxy polyester; they ensure high protection and environmental adaptability.

The infrared beam has a wavelength of 850 nm. IR illuminators are assembled with stainless steel screws and "O" rings which guarantee a IP66 weatherproof standard (IP65 for IR300).

Lamps with different light beams (spot, flood, wide flood) are available.

They're recommended for military surveillance, perimeter surveillance, airports and prisons.

INFRARED BEAM/DISTANCE CHART

	VAC	HORIZONTAL BEAM	VERTICAL BEAM	DISTANCE (m / ft) *
IR50 spot	12	10°	10°	20 / 65
IR50 flood	12	40°	40°	16 / 52
IR50 wide	12	60°	60°	12 / 39
IR50 flood	230	40°	40°	16 / 52
IR300 spot	230	10°	8°	65 / 213
IR300 flood	230	23°	10°	50 / 164
IR300 wide	230	40°	20°	35 / 114

* Typical distance of the subject to illuminate; it depends of the reflection coefficient of the illuminated scene, camera sensitivity at IR wavelength, lens combination, etc.
