## Time and Attendance Biometric

Like the idea of a time and attendance program, but want to have more security for your system? With WaspTime -- Time and Attendance Biometric you can enjoy the benefits of an automated time and tracking system with the added security of fingerprint authentication.

Perfect for small to medium size businesses, the WaspTime system is easily connected to a PC or a network computer using the built in Ethernet (RJ-45) network connection and included cables. Need additional clocks for a back entrance? The system easily supports and automatically recognizes additional clocks on your network. Need to expand as your company grows? The software license initially supports up to 50 employees. Additional software licenses can be purchased in increments of 50. And of course, additional employee badges can be purchased as your needs require.

WaspTime

Wasp Biometric Time Clock
