PRODUCT SPEC SHEET Zebra CS1504 Consumer Memory Scanner

# Zebra CS1504 Consumer Memory Scanner

### Shop anytime, anywhere with the Zebra CS1504

While Web access has given customers the freedom to shop anytime, the Zebra CS1504 Consumer Memory Scanner gives them true mobility to shop anywhere. Another breakthrough in consumer bar code scanning technology from Zebra, the CS1504 Consumer Memory Scanner enables customers to capture bar codes on retail merchandise in order to create a shopping list, purchase an item or simply link to the Web for further content about the item of interest . Anyone can use this pocket-sized scanner to read bar codes found on merchandise or in catalogs from virtually anywhere. Small and lightweight enough to fit in a pocket or purse, customers can use this scanner at home, in the store or on-the-go. It makes routine tasks, such as reordering groceries or office supplies, quicker and easier than ever before. Ideal for list-making and gift-registry applications, it can be a great incentive for your preferred customers. Now you can embed bar codes in your print advertisements, catalogs and on merchandise to convert the printed page into a two-way communication channel between you and your customers ' creating fast, efficient order entry and reducing the need for expensive, labor-intensive call centers. When used with an Internet/Intranet store kiosk, the CS1504 doubles as an in-store mobile shopping tool. Shoppers can also use it to scan items for further information on price, availability, features, rebates, special offers or similar products. Merchants can respond with one-to-one marketing messages.

### Simply point, click and scan

With the CS1504, customers simply point and click. Any bar-coded item is quickly and easily scanned and captured. Up to 150 codes can be stored in the internal memory and removed by the user at any time. Captured bar codes are easily uploaded to a host application via cable connection. Plus, the CS1504 also acts as a tethered scanner when attached to a host system.
