

NX 5500 INTEGRATED SERVICES PLATFORM

NEXT GENERATION WIRELESS SERVICES FOR SMALL AND MID-SIZE ENVIRONMENTS

The NX 5500 brings the next generation in WLAN speed, security, reliability and flexibility to the midsize enterprise, providing comprehensive management and control of up to 512 network elements through a single pane of glass. With the NX 5500, all network infrastructure is empowered with the intelligence to make the best routing decisions, you get maximum speed and throughput — the congestion and latency associated with routing traffic through a centralized controller is eliminated.

A highly cost-effective platform for optimized WLAN performance

The NX 5500 multi-core network processing platform supports up to 512 access points, well suited for small to mid-sized deployments. Its rich set of integrated services — including router, firewall, VPN, AAA/Radius server and DHCP/DNS server — eliminates the need for any additional hardware without compromising system performance. And the integrated application visibility engine provides the necessary intelligence to identify, categorize and filter/block/control network bandwidth usage based on your business needs.

Centralized Management and control from the NOC through NX / VX

The network of distributed, multi-network NX 5500 deployments can be controlled and managed at the NOC through your NX9XXX/NX75XX/VX9000 — giving you a single-pane-of management for easy provisioning and day-to-day monitoring and troubleshooting of your entire WLAN infrastructure.

Powered by the advanced WiNG 5 operating system

WiNG 5 provides the advanced brainpower required to create the “fully network aware” WLAN, allowing every piece of infrastructure in your wireless network to work together to route every transmission as efficiently as possible.

WiNG 5 includes:

- **Plug-and-play:** Fast and easy zero-touch installation plus rule-based access point adoption from all locations automates equipment discovery and deployment.
- **Smart Routing:** Every piece of infrastructure in your WLAN has the intelligence required to work together to route every transmission as efficiently as possible. Traffic is no longer routed through a centralized controller, eliminating network congestion and latency.
- **Comprehensive integrated network security services:** Wired/wireless firewall, built-in wireless intrusion protection system (WIPS), integrated IPSec VPN gateway, AAA Radius Server and secure guest access with a captive web portal, and much more.
- **Smart RF:** Smart RF management mitigates the RF disruption caused by Wi-Fi and non-Wi-Fi interference, faulty antennas, dynamic dead spots or neighboring access point failures by allowing the WLAN to automatically and intelligently adapt to changes in the RF environment.
- **BYOD support:** The WiNG 5 OS provides the device fingerprinting and role based policy required to help manage and secure user-owned devices.

Specification Chart

PHYSICAL CHARACTERISTICS		USER ENVIRONMENT	
Dimensions	1U, rack mountable 16.93 in. W x 1.74 in. H x 12.63 in. D 430 mm W x 44.2 mm H x 320.7 mm D	Operating Temp.	32°F to 104°F/0°C to 40°C
Weight	10 lb./4.5 kg	Storage Temp.	-4°F to 158°F/-20°C to 70°C
Memory	4 GB RAM	Operating Humidity	5% to 85% at 104° F/40° C
Storage	32 GB Solid state drive for firmware images and critical data	Storage Humidity	5% to 95% at 104° F/40° C
Power Supply	100 Watts, 100-240V AC PSU	INTERFACES AND MANAGEMENT	
Power Consumption	30 Watts	<ul style="list-style-type: none"> • Six 10/100/1000 Base-T Ethernet ports (copper) • Two USB 2.0 interfaces • RS-232 serial console (RJ-45) interface • LCD panel with navigation buttons 	
CAPACITY AND PERFORMANCE		PRODUCT SKUS AND LICENSES	
APs Supported	512	NX-5500-100R0-WR	NX 5500 Services Platform
Data Throughput	6 Gbits/sec.	NX-5500-ADP-16	16x AP license pack for NX 5500
Crypto Throughput	2 Gbits/sec.	NX-5500-ADP-64	64x AP license pack for NX 5500
RF Domains	512	NX-5500-ADP-128	128x AP license pack for NX 5500
WLANs	256		
Wireless Clients	16K		

DELIVER BEST-IN-CLASS WIRELESS PERFORMANCE, SIMPLIFY NETWORK CONTROL, REDUCE NETWORK COSTS AND PROVIDE YOUR WORKERS WITH MORE WIRELESS SERVICES TO INCREASE BUSINESS EFFICIENCY WITH THE NX 5500 INTEGRATED SERVICES PLATFORM.
