

# TOP MOBILE COMPUTERS

## MC9200

### INDUSTRY LEADING MOBILE COMPUTER FOR DEMANDING APPLICATIONS

- Industry proven rugged design to handle the rigors of any environment.
- Best-in-class bar code scanning with 6 advanced scan engine options to scan any 1D, 2D, Driver's License, or DPM code.
- Powerful dual core 1GHz processor to run complex applications simultaneously.
- High-speed and FIPS 140-2 certified wireless connectivity for the best possible and most secure wireless connection.
- The next evolution in the long standing, reliable MC9000 family of mobile computers

## MC2100

### DATA COLLECTING FOR THE VALUE CONSCIOUS USER

- Superior ergonomics - made for comfort and optimized for one-hand use.
- Affordably manage inventory and assets, pick orders, receive/replenish stock, or any other data collection function in your business
- More scanning options in its class - 1D linear imager, 1D laser or a 1D/2D area imager to read even damaged or dirty codes.
- Rugged IP54 design for everyday use with the inevitable drops, tumbles, and spills.
- Easily replace dated paper-based forms while improving accuracy and efficiency.

## MC67

### SUPERIOR PRODUCTIVITY DESIGNED FOR THE FIELD WORKFORCE

- Instantly access any data in the field with high-speed Wi-Fi and 4G connectivity.
- Advanced scanning technology and high resolution camera options ensure you can capture any and all data in the field.
- Designed for field use in heat, cold, rain or snow.
- Backwards compatibility with MC55/MC65 accessories for any easy and cost-effective upgrade.
- The perfect single mobile tool for any type of transaction from fixing equipment and delivering shipments to taking customer orders, conduction inspections, or issuing citations.

## MC3100

### COST-EFFECTIVE RUGGED MOBILITY WITHIN THE ENTERPRISE WALLS

- Superior scanning performance to ensure you capture any data you need.
- Purpose-built for demanding environments within the enterprise walls with superior rugged specifications
- Six different models to meet diverse application needs with turret, straight-shooting, or gun grip form factors.
- Motorola Max Secure wireless connectivity with FIPS 140-2 Certification for the safest possible wireless experience.
- Compatibility with Motorola Mobility Services Platform (MSP) and Motorola Mobility Suite for superior centralized and remote management of all devices.

## MC45

### ENTERPRISE VALUE WITHOUT COMPROMISE FOR FIELD MOBILITY

- Pocketable design that is easy to hold with a large enough screen so it's still easy to use.
- "Inside-outside" wireless connectivity with Wi-Fi (802.11/a/b/g/) and 3.5G GSM.
- Delivers a full shift on a single battery charge even with wireless intensive applications.
- Dependable GPS access to real-time directions and geostamps that automatically capture information for applications
- The perfect mix of features and enterprise rugged design to empower your mobile workforce while fitting your budget.
