

AXIS 210/211 Network Cameras

Superior video quality for professional indoor and outdoor applications

AXIS 210 and AXIS 211 Network Cameras from the market leader in network video, are ideal for indoor and outdoor surveillance and remote monitoring.

The network cameras provide the best image quality in their class, using a progressive scan CCD sensor and powerful real-time image processing hardware to guarantee full frame rate, even at VGA resolution. Connecting directly to IP networks, the built-in Web server, open application interface, and sophisticated networking functions based on open industry standards greatly simplify systems integration.

AXIS 211, with built-in Power over Ethernet – which enables power to be delivered to the camera via the network – reduces cabling requirements and installation costs, and consolidates power for higher reliability.

AXIS 210 and AXIS 211 provide the perfect solution for securing offices, shops, schools and other facilities over the local area network or across the Internet.

- Superior image quality using progressive scan CCD and advanced video processing
- Up to 30 frames per second in VGA 640 x 480 resolution
- Simultaneous Motion JPEG and MPEG-4 streams optimize for quality and bandwidth
- Built-in motion detection with pre- and post-alarm image buffering
- Power over Ethernet support (IEEE 802.3af) simplifies installation (AXIS 211)
