less weight in modern mobile devices⁴

Legacy mobile devices...

Old technology is holding you back!

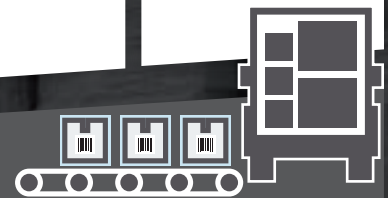

Outdated Windows® mobile OS's make security, support, repairs, & old workflows a drag on your business.

...are slowing you down!

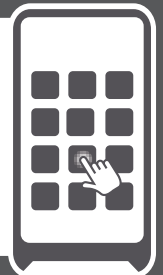

- Slower task completion
- Less intuitive, green screen push-button devices
- Battery changes prompt cold reboots, downtime, & lost productivity
- Lack of replacement parts leads to retired devices and slower operations
- Longer training with unfamiliar interfaces and Ux.

New mobile OS devices...

New technology helps you thrive!

Modern Android OS is the market leader for today's on-demand economy. Purpose-built devices bring the latest technology and lowest total cost.

...drive new benefits!

- Gain efficiency with faster apps, updated workflows and fewer keystrokes
- Increase throughput with faster, advanced scanning technologies
- Increase uptime with longer battery life and hot swap batteries
- Multiple support options to keep your devices going
- Faster on-boarding with a familiar user interface
