Optimize your Manufacturing Operations

RFID Solutions to overcome every obstacle

Managing your supply chain can be a challenging task, always needing to be aware of what components are coming in and what products are going out. Today's customers demand products to be manufactured on time, delivered fast, and to the exact specifications of what they ordered. Only Barcodes, Inc. helps manufacturers simplify their manufacturing, work in process, and shipping verification through the design and implementation of RFID portal solutions.

Maximize your manufacturing throughput

- Shipment Receipt Verification
- Work in Process Visibility
- Just-in-time operational workflow

- Inventory Control
- Conveyor Item Sorting
- Container Tracking

Our portfolio of RFID solutions help streamline every area of your operation—ensuring optimized asset management, less downtime, and instant access to analytics that help you make proactive business decisions.

Gain immediate insight into your manufacturing operations

Eliminate your technology debt with solutions which provide real time data to amplify your productivity and accuracy

1 Dock Door RFID Portal
Verify contents of incoming and outgoing components
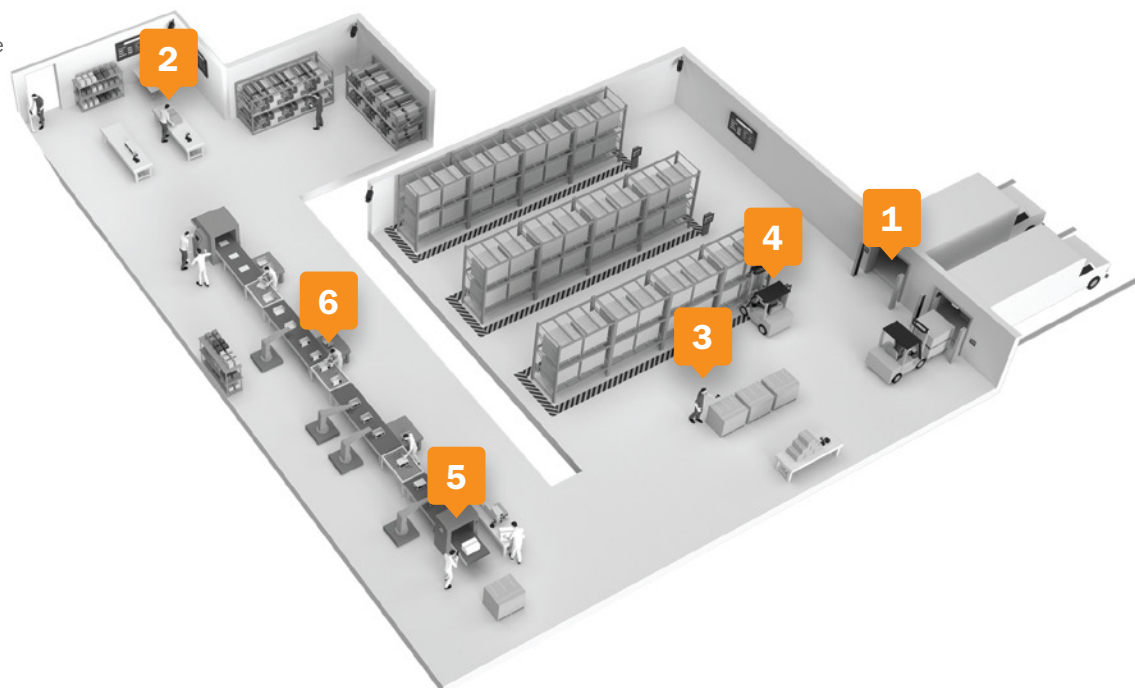

2 RFID Enabled Tabletop
Accurately identify assets on table or box for shipment fulfillment

3 Handheld RFID Readers
Ultimate flexibility in mobile inventory

4 RFID Enabled Pallet
Forklift enabled inventory management

5 Tunnel RFID
Read tags in any orientation on conveyor system

6 RFID Printing & Labeling
On demand RFID printing and labeling

Barcodes RFID Solutions – Fully Managed & Turnkey

D-Series
Dock Door Portal

T-Series
Tunnel Portal

M-Series
Mobile and Tabletop Readers

Take a modern approach to manufacturing

Keep an eye on quality control, high-value assets, and even works in process. And do it all with ease, for years to come with RFID. Partnering with Barcodes, Inc. gives you access to not only a global provider, but a portfolio of integrable and customizable services and solutions meant to support you from concept to completion, and well after.

Device-as-a-Service
Enable a predictable OPEX model by bundling innovative devices with a variety of services and software

Hardware Support & Management
Avoid downtime and costly repairs with comprehensive coverage and device management services, plus Overnight Spare Pool, and Manufacturer RMA services to keep critical business running nonstop

Installation Services
Ensure your portals are properly constructed with a team of seasoned installers ready to built out your customer solution

Engineer Site Visit
Certified RFID Engineers to align antennas and confirm optimal read range and accuracy of the tags

SLS View

Leverage RFID software to improve our supply chain visibility and efficiency. SLS® View software allows customers to have real time visibility into the movement of their assets and products, whether that be at a dock door, a tunnel or mobile device. Integrate into front-end and back-end systems with our fleet of software modules.

Software Solutions
Utilize software and integration support to ensure your assets accurately and comprehensively tracked in your systems

Site Surveys
Assess infrastructure and environment to determine how RFID can enable optimal results

Insights to Optimize

Use RFID to boost conveyor belt productivity and tracking technology to optimize traceability. Even simplify reordering and replenishment. Barcodes, Inc. suite of fully managed, turnkey solutions help grow profit margins and make manufacturing easier. Transform your enterprise with services and solutions designed to optimize manufacturing at every turn, all on one secure, fully integrated network.
