

Automate your Warehouse

Improve Operational Efficiencies with AMR Solutions

What used to be one week fulfillment is now next day fulfillment, what used to be next day fulfillment is now same day and hours from customer's checkout. Warehouse operational speed and demand are ever increasing. On the other hand, labor shortage and supply chain crisis is creating more disruptions in the logistics industry. Only Barcodes, Inc. provides the right combination of next generation AMR and warehouse automation solutions to fulfill today's warehouse speed, scalability and flexibility needs with great ROI and higher integration flexibility.

Revolutionize your warehouse

- Assisted Picking Fulfillment AMRs
- Freight Pallet AMR
- ConveyorTop AMR
- CartConnect AMR
- Shelf AMR
- TagSurveyor AMR for Cycle Counting
- Autonomous Forklift & Pallet Truck
- Autonomous Tugger
- Cobot Pallet Jack

Our portfolio of AMR solutions help streamline every area of your operation—ensuring optimized goods movement, less unproductive travel time, and instant ROI to help you focus on growing your business.

Achieve amplified productivity with top-of-the-line tech

Transform your warehouse with robots that boost efficiency, customer loyalty, and profits

1 Fulfillment – Each Picking

Automate each picking workflow for your fulfillment center for higher throughput with our collaborative robots series

2 Case Picking

Fulfill case orders autonomously and faster

3 Putaway

Track and Transport product from the receiving dock to storage location with pallet AMR and intralogistics solution

4 Replenishment

Move inventory from storage to picking and shipment locations

5 Kitting and Picking

Gather components, supplies, tools, or parts into one load for consolidated shipment

6 Long Haul

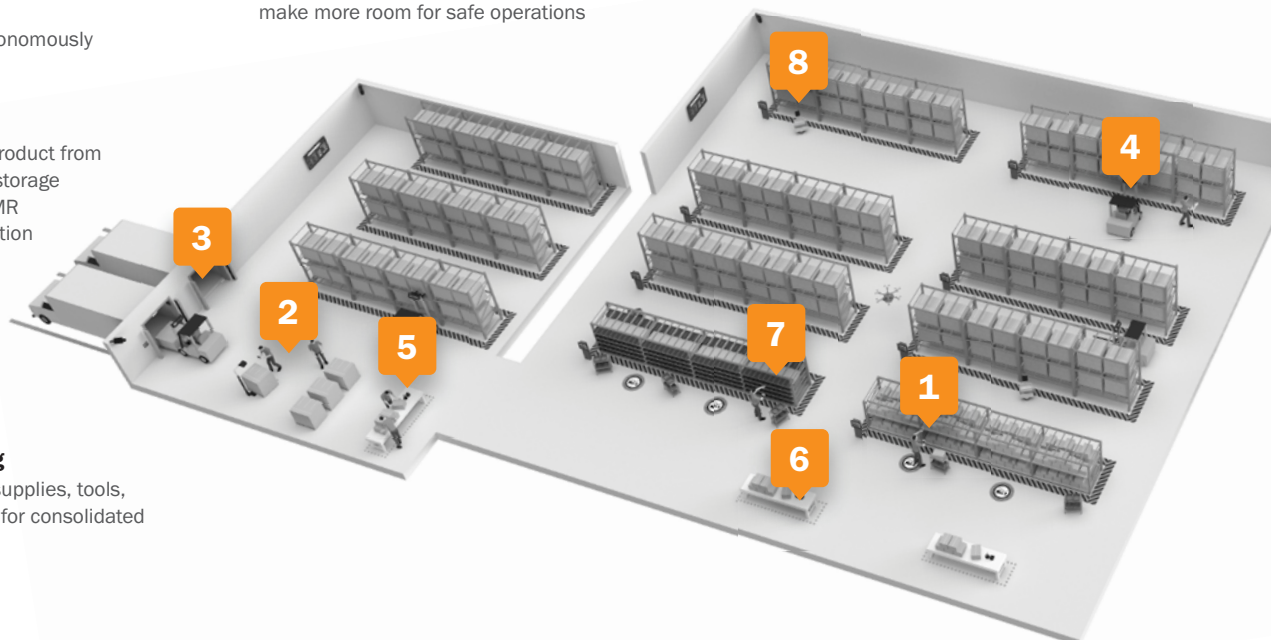

Transport heavy pallets or product over long distances

7 Recycling

Carry recycling and waste away to make more room for safe operations

8 Cycle Counting

Autonomously conducting cycle counts to ensure materials are maintained at the right levels to support production output

Barcodes, Inc. for Your Warehousing

- Get consulted on the best possible solution that fits your requirements instead of a rigid automation solution provided by a single manufacturer
- Your one stop shop for HW, SW, and Services solutions in Mobile Robotics, Enterprise Mobility, Automated Printing and Labeling, RFID, and Access Control
- Easy and seamless to select, shop, deploy, integrate, and maintain robotics systems with Barcodes, Inc.

Engineering Site Visit

Certified AMR Engineers to orchestrate robotics solutions feasibility.

Site Surveys

Assess infrastructure and environment to determine how AMRs can enable optimal results.

Custom Solution Design

Consulting and Custom warehouse automation solution design with a combination of multiple AMRs and multiple automation workflows.

Robotics Hardware Deployment

Rapid automation hardware deployment and effortless project completion from procurement to Go-Live with project management services.

Systems Integration

Seamless integration of robotics system with WMS & other warehouse automation components.

After-Care

Responsive and easy after Go-Live and system maintenance support with TrueView platform.
